HISTORICAL STATEMENT

In 1873, the formal educational work of the Montreal Young Men's Christian Association found its inception in the organization of vocational and general educational classes which later developed into the system of units known as the Y.M.C.A. Schools. ● In 1920, the Evening High School was inaugurated, and in 1926 the name Sir George Williams College was adopted to designate, from that time forward, the expanding formal educational programme of the Young Men's Christian Association in Montreal. (Sir George Williams was the founder of the Y.M.C.A. in London, June 6, 1844.) In 1926 also, the College was made co-educational. ● In 1928 the Association held a building campaign for \$1,500,000, part of which sum was to provide enlarged facilities for the work of the College. ● In 1929, the College programme was extended to include First Year of Arts, Science, Commerce and Engineering. ● In 1930 the College entered into occupation of an enlarged plant and equipment, including thirty classrooms, science laboratories, lecture rooms, assembly hall and library. ● In 1931, the Junior College of Arts, Science and Commerce was organized, offering two full years of College work leading to the Diploma of Associate. ● In 1932, day courses were inaugurated in the Junior College, providing Pre-Professional and Associate programmes of study. ● In 1934, the expansion of the Junior College into the Faculty of Arts, Science and Commerce was announced. ● Members of the first graduating class were awarded the Bachelor's degree in 1936.

MAJOR CHANGES AND ADDITIONS FOR THE YEAR 1943-44

Sir George Williams College and the Sir George Williams Schools

In order to make clearer the distinction between courses at the college level and those at the secondary level and in vocational fields, the name Sir George Williams College now refers to the unit which has been known since 1929 as the Faculty of Arts, Science and Commerce. The other units of the institution are now designated Sir George Williams High School, Sir George Williams Elementary School, Sir George Williams Business School, and Sir George Williams School of Art.

New Laboratories

The former biology laboratory has been moved to larger quarters and completely refitted with modern equipment, while an additional chemistry laboratory for advanced work has been equipped in the place of the former biology laboratory. The laboratories are described on pages 16 and 17.

New Grading System

Course grades assigned after June 30, 1943, will be awarded according to a new (and more commonly used) letter system: A-B-C-D-E-F, rather than A+, A, A-, B+, B, C, F. Details are given on page 22.

Engineering Matriculation

Arrangements have been made with McGill University whereby students preparing at Sir George Williams College for entrance to the Faculty of Engineering of the University may take English 101 and 116 (or English 100 if their mother tongue is other than English) in lieu of senior matriculation English, and Natural Science 101 in lieu of the optional subject required for engineering matriculation, and may write Sir George Williams examinations only in these three courses. They must continue, however, to write McGill senior matriculation examinations in the required courses in Chemistry, Physics and Mathematics.

Chartered Accountants

Students holding the Bachelor of Science (Commerce) degree from Sir George Williams College are now exempt from certain courses and examinations required by the Society of Chartered Accountants of the Province of Quebec, and from two of the five years of apprenticeship required for the C.A. degree. See pages 34 and 35.

Mathematics and Physics

Formerly students were permitted to take either Mathematics 101 or 101A, and either Physics 101 or 102, for credit. Now, under certain conditions, all four may be taken for credit. See pages 46-49.

New Courses

The admissions policy of Sir George Williams College is based, in part, on the assumption that an able high school graduate should be admitted to college regardless of the pattern of his high school curriculum. This implies that the college must be prepared to adapt its curriculum to the needs of students. As another step in making possible such adaptation, the College offers a new course in the Elements of Mathematics (Mathematics 100) designed for high school graduates who have not taken algebra and geometry during their secondary schooling. It is outlined on page 46.

To encourage appreciation of the culture of French Canada, a new course in French-Canadian Literature (French 104) will be taught in the French language. This half course may be substituted for a half course in English by students studying for the Bachelor of Arts degree. See page 59.

Other new courses are: Ecology (Biology 108), Advanced Calculus (Mathematics 108), English Literature of the Seventeenth and Eighteenth Centuries (English 107), Studio Course in Modelling and Sculpture (Fine Arts 108), Introduction to the Italian Language (Italian 101), Introduction to the Russian Language (Russian 101), Basic Problems in Economic Theory (Economics 111), and Public Finance (Economics 112).

CALENDAR

Academic Year 1943-44

1943

MONDAY, JUNE 7.	Summer term begins in Evening Division.
THURSDAY, JULY 1.	Dominion Day. No lectures.
TUESDAY, AUGUST 31.	Last day for receiving applications to write supplemental examinations.
MONDAY, SEPTEMBER 6.	Labour Day. No lectures.
MONDAY, SEPTEMBER 13.	Summer term final examinations begin.
THURSDAY, SEPTEMBER 30.	Supplemental examinations begin.
MONDAY, OCTOBER 11.	First term begins in Day and Evening Divisions.
MONDAY, OCTOBER	Founder's Day.
THURSDAY, NOVEMBER 11.	Thanksgiving Day. No lectures in Day Division.
FRIDAY, DECEMBER 17.	Remembrance Day.
SATURDAY, DECEMBER 18.	Last day of classes in Evening Division before Christmas vacation.
	Last day of classes in Day Division before Christmas vacation.

1944

MONDAY, JANUARY 3.	Classes re-open in Day and Evening Divisions after Christmas vacation.
FRIDAY, JANUARY 14.	First term examinations begin in Day Division.
MONDAY, JANUARY 24.	First term examinations begin in Evening Division.
MONDAY, JANUARY 31.	Second term begins in Day Division.
FRIDAY, APRIL 7.	Second term begins in Evening Division.
SATURDAY, APRIL 8.	Good Friday. No lectures.
SUNDAY, APRIL 9.	No lectures.
MONDAY, APRIL 10.	Easter Day.
SATURDAY, APRIL 22.	Easter Monday. No lectures in Day Division.
THURSDAY, APRIL 27.	Last day of classes in Day Division.
MONDAY, MAY 8.	Final examinations begin in Day Division.
WEDNESDAY, MAY 24.	Final examinations begin in Evening Division.
FRIDAY, JUNE 2.	Empire Day.
	Graduation.

BOARD OF GOVERNORS

OFFICERS OF ADMINISTRATION

Kenneth Everette Norris, M.A., Ph.D.
Principal

Henry Foss Hall, B.A., L.R.E.
Dean

Edward Fletcher Sheffield, M.A.
Registrar and Bursar

Henry George Worrell, B.A.
Assistant Bursar

OFFICERS OF INSTRUCTION

Members of the Faculty Council

John Stanley Allen, M.A. (U.B.C.), Ph.D. (McGill),
Senior Professor in the Natural Sciences Division

James Winfred Bridges, B.A. (McGill), M.A., Ph.D. (Harvard),
Professor in the Social Sciences Division

Robert Nelson Elliot,
Lecturer in the Social Sciences Division

Henry Foss Hall, B.A. (Eastern), L.R.E. (M.D.T.C.),
Dean of the Faculty and Professor in the Natural Sciences Division

Kenneth Everett Norris, M.A., Ph.D. (McGill),
Principal of the College and Acting Senior Professor in the Social Sciences Division

Edward Fletcher Sheffield, M.A. (McGill),
Registrar and Bursar of the College

Claude Willett Thompson, M.A. (Oxon.),
Senior Professor in the Humanities Division

Other Officers of Instruction

Mildred Mary Adam, P.C.T.,
Instructor in the Social Sciences Division

James Russell Adams, M.Sc., Ph.D. (McGill),
Associate Professor in the Natural Sciences Division

Thelma Sanford Allen, A.T.C.M.,
Lecturer in the Humanities Division

Alexander King Ames, B.A. (Bishop's), B.Sc. (Leeds), A.I.C.,
Lecturer in the Natural Sciences Division

John Bruno Balestreri Archer, B.A. (S.G.W.C.), F.C.B.A.,
Lecturer in the Humanities Division

William Henry Chodat,
Lecturer in the Humanities Division

Douglass Burns Clarke, B.A. (S.G.W.C.), Graduate, Hart House School of the Theatre,
Assistant Professor in the Humanities Division and Director of the Playmakers' Workshop.

John Thomas Cook, M.A. (Sask.), B.Paed. (Toronto), Ed.D. (Harvard),
Lecturer in the Social Sciences Division

John Crawford,
Lecturer in the Social Sciences Division.

Ernest William Vaughan Deathe, B.A. (Dalhousie),
Lecturer in the Natural Sciences Division

Ana Grace Denton, B.A. (McGill),
Lecturer in the Humanities Division

Edwin George Drake,
Lecturer in the Natural Sciences Division

Dorothy Frances Dyer, P.C.T.,
Instructor in the Social Sciences Division

Edward Allan Morgan Edson, B.A., B.C.L. (McGill),
Lecturer in the Social Sciences Division

Harold Bertram Fewkes,
Lecturer in the Social Sciences Division

Alan Robert Ralph Finlayson, B.Sc. (S.G.W.C.),
Lecturer in the Natural Sciences Division

James Gilchrist Finnie, P.C.T.,
Lecturer in the Social Sciences Division

Rolf Freidrich Flore (Munster),
Assistant Professor in the Humanities Division

Michael Roy Foran, M.Sc. (Sask.), A.C.I.C.,
Lecturer in the Natural Sciences Division

William Maxwell Ford, B.A., B.C.L. (McGill),
Lecturer in the Social Sciences Division

Winifred Petersen Francis, B.A. (S.G.W.C.),
Lecturer in the Humanities Division

John Capill Gilmer, C.A.
Assistant Professor in the Social Sciences Division

Anne Philethea Graham, M.Sc. (McGill),
Instructor in the Natural Sciences Division

William Eric Griffiths, B.Sc. (McGill),
Lecturer in the Natural Sciences Division

Gordon Hamilton Guest, M.A. (Saskatchewan), Ph.D. (McGill),
Assistant Professor in the Natural Sciences Division

William Lindsay Hutchison,
Instructor in the Natural Sciences Division

Ernest Starkey Kelsey, B.Sc. (E.E.) (Man.), M.Eng. (McGill),
Lecturer in the Natural Sciences Division
 Stanley Frederick Knights, B.Sc. (S.G.W.C.),
Lecturer in the Natural Sciences Division
 Thomas Lamont, B.A. (McGill),
Lecturer in the Humanities Division
 Charles Lasdin, B.Sc. (Com.) (S.G.W.C.),
Lecturer in the Humanities Division
 John Gaudaire Mackinnon,
Lecturer in the Humanities Division
 Samuel Madras, B.Sc. (S.G.W.C.),
Lecturer in the Natural Sciences Division
 Norman St. Clair Manson, B.A. (S.G.W.C.),
Lecturer in the Humanities Division
 James McCorkindale, Graduate, Glasgow School of Art,
Lecturer in the Humanities Division
 George Stuart Mooney,
Lecturer in the Social Sciences Division
 John Scott Nixon, B.A. (McGill),
Lecturer in the Social Sciences Division
 Gordon Pall, B.A. (Man.), M.A. (Tor.), Ph.D. (Chicago),
Lecturer in the Natural Sciences Division
 Faivel Panther, B.Eng., Ph.D. (McGill),
Assistant Professor in the Natural Sciences Division
 Edward Russell Paterson,
Lecturer in the Natural Sciences Division
 Philip Thomas Renouf Pugsley, C.A.,
Lecturer in the Humanities Division
 Herbert Furlong Quinn, B.A. (S.G.W.C.),
Lecturer in the Social Sciences Division
 Howard Crispin Reid, B.A. (McGill), M.S. (Trans.) (Yale),
Lecturer in the Social Sciences Division
 Annie Christine Robertson, Ph.B., J. D. (Chicago),
Lecturer in the Social Sciences Division
 Clifford Goheen Robertson, Ph.B., M.A. (Chicago),
Associate Professor in the Social Sciences Division
 Archibald Stewart Ross, B.A. (Western Ontario), A.M. (Oberlin),
 Ph.D. (McGill),
Lecturer in the Natural Sciences Division
 Fernand Emile Norbert Rossaert,
Lecturer in the Natural Sciences Division

Gordon Oliver Rothney, B.A. (Bishop's), M.A., Ph.D. (London),
Assistant Professor in the Social Sciences Division
 Frederick Arthur Rutherford, C.A.
Assistant Professor in the Social Sciences Division
 Sybil Mary Scoggan, M.Sc. (McGill),
Lecturer in the Natural Sciences Division
 George Winston Sinclair,
Lecturer in the Natural Sciences Division
 George Donovan Smith, A.C.I.,
Lecturer in the Social Sciences Division
 Maurice Raymond Smith, M.A. (Edin.),
Associate Professor in the Natural Sciences Division
 Baxter Garfield Spracklin, B.A., B.Sc. (Acadia),
Assistant Professor in the Natural Sciences Division
 Ernest Stabler, B.A. (Queen's), M.A. (McGill),
Lecturer in the Humanities Division
 Raymond Donald Stiles, B.Sc. (N.S.T.C.),
Lecturer in the Natural Sciences Division
 Marguerita Atkinson Sykes,
Instructor in the Social Sciences Division
 Clotilde Jimenez Thibault, B.E., B.S., C.E.S., C.A.P., L.Letras
 (University of Madrid and the Sorbonne),
Lecturer in the Humanities Division
 Merton Stafford Threlfall,
Lecturer in the Social Sciences Division
 Harry Gilbert Tuttle, M.A. (McGill), B.D.,
Assistant Professor in the Social Sciences Division
 Paul Villard, M.A., D.D., M.D., Chevalier de la Légion d'Honneur,
Associate Professor in the Humanities Division
 Wilfrid Watson Werry, B.Com., M.A. (McGill), C.A.,
Lecturer in the Humanities Division
 Orson Wheeler, B.A. (Bishop's), A.R.C.A., S.S.C.,
Lecturer in the Humanities Division
 Henry Hewitt Worsfold, B.A. (Cantab.), M.A. (McGill),
Assistant Professor in the Humanities Division
Librarians
 Jean Breakell Crombie, Diploma of Library Administration
 (McGill),
Librarian
 Margaret Alice Webb, B.A. (S.G.W.C.), B.L.S. (McGill),
Assistant Librarian

General Statement

Sir George Williams College is directed by a Board of Governors whose authority is vested in it by the Metropolitan Board of Directors of the Young Men's Christian Association of Montreal. Its charter consists in the Act of Incorporation of the Young Men's Christian Association of Montreal, passed by the Legislature of the Province of Quebec, June, 1888.

The purpose of the College is to provide general and pre-professional education for young men and women. While general college education is the aim of the programmes of study, provision is made for specialization in certain subject matter fields.

The three curricula, in Arts, in Science, and in Commerce, are outlined in detail in later pages of this Announcement.

Degrees, Diplomas and Certificates

DEGREES OF BACHELOR. The degrees of Bachelor of Arts, Bachelor of Science and Bachelor of Science (Commerce) are awarded upon successful completion of four-year courses of study in the Day Division of the College (Faculty of Arts, Science and Commerce), or the equivalent in the Evening Division.

DIPLOMAS OF ASSOCIATE. For students who plan to spend less time in study beyond high school graduation than is required for a Bachelor's degree the College offers three two-year programmes (three-years in the Evening Division) leading to the diplomas of Associate in Arts, Associate in Science and Associate in Commerce. Work done in fulfilment of the requirements for the Associate's diploma is applicable, of course, for credit toward a degree.

DIPLOMA IN ASSOCIATION SCIENCE. This diploma is awarded to students training for the Y.M.C.A. secretaryship, for professional training taken concurrently with studies for the Bachelor's degree.

CERTIFICATE OF CREDIT. Students taking partial programmes, i.e., those who are following one or more subjects but are not proceeding to a degree or diploma, are awarded a Certificate of Credit in each subject upon completing the required work and passing the required examination.

Enrollment

The total enrollment of Sir George Williams College and the Sir George Williams Schools during the academic year 1942-43 was 3,314 individual students. Of these 1,248 were in the College (Faculty of Arts Science and Commerce), day and evening divisions.

Men and Women Students

The College is co-educational, women being admitted to all courses on the same basis as are men.

The Aims of the College

The fundamental educational philosophy of Sir George Williams College is that its chief concern shall be the development of persons, through the medium of formal education and its correlated activities. It is recognized that this is not accomplished by mere rote learning. While the subject matter of the curriculum is divided into "courses" for the sake of convenience in administration, the primary aim of the College is that students shall grow in character and personality as well as in those techniques and appreciations which may be required in full and satisfactory living. The units which go to make up such growth may be conveniently classified as attitudes, abilities and skills. It is the development of these that the College endeavours to foster in its students.

This principle is not in the least opposed to good scholarship. On the contrary, scholarship can be sound only when it is vital, when it is a living process. For example, attitudes, or ways of feeling toward individuals, institutions and other elements of one's environment, are as much a part of a person's growth as is the attainment of information, important though this may be.

Because of varying interests, aptitudes and vocational aims, a modern educational institution must provide a wide range of educational experiences for its students. In the College these experiences, traditionally called the "curriculum", are divided into three broad areas of life, viz.: (a) the nature of the world in which we live (the Natural Sciences), (b) the nature of man and of the society of which he is a part (the Social Sciences), and (c) the cultural heritage of thought, language and the arts which, though it reaches back to the dawn of history, is being continuously remade in our day (the Humanities). Believing that educated people should come into intimate contact with all of these areas of life, it is provided that the academic experience of every student should include work in each of these major fields. One attempt to accomplish this is the provision of the three exploratory "pandemic" courses. The emphasis placed upon the study of contemporary English literature and of modern writings in the fields of science, social science and the arts is another indication of this point of view.

The members of the staff of Sir George Williams College are wholly devoted to the teaching and guidance of students. Contacts between faculty members and students are by no means confined to

the classroom and, while students are encouraged to do independent and constructive work, staff members are always available for consultation.

Student Guidance

Education being considered the process of stimulating and guiding the growth of individual students, all of the incidentals of education — instructors, courses of study, textbooks, examinations—are considered valuable only in so far as they serve these ends.

In addition to the fact that this concept permeates its academic work, the College has for many years maintained a programme of educational, vocational and personal guidance for its students. Several members of the College staff are trained and experienced in the techniques of personnel work. The orientation of the student to college work, the selection of suitable courses of study, the giving of assistance in the choice of a vocation, all in the light of discovered aptitudes, abilities and interest, are among the problems dealt with in the personnel work of the College. Students and their parents are urged to take full advantage of this service.

Evening Division

For employed young men and women who for financial or other reasons are unable to attend college by day the Evening Division of the College offers the same programmes and courses of study as are available in the Day Division.

The outlines of the various courses of study, on pages 39 to 79 of this Announcement, apply to both Day and Evening Divisions. The standard of achievement demanded of the students in the Evening Division is strictly that of the Day Division, the subject matter is the same and equal academic credit is allowed.

Partial course students also are enrolled in the Evening Division. These include all those who wish to enroll for single subjects at the college level without necessarily working toward a diploma or degree.

Length of Courses

DAY DIVISION. The time ordinarily required to complete the work required for a degree in the College is four years. During this time twenty-one full courses must be completed, as indicated on pages 30 and 31 where curricula are discussed. Provided a proper sequence of courses is followed the student may upon the completion of two years, or eleven full courses, be awarded the Diploma of Associate in Arts, in Science or in Commerce, as the case may be.

In certain cases arrangements may be made to complete the required number of courses for a degree or diploma over a longer period. However, the practice of taking partial courses is discouraged in the Day Division. By attending two summer sessions the length of time usually required for completion of the degree course may be reduced from four to three years.

EVENING DIVISION. As in the Day Division the number of courses required for a degree is twenty-one and, for a diploma, eleven. The number of years required depends, in each case, upon the subjects chosen by the student and the amount of class work he is able to complete each year. In general, however, an efficient student may complete the work required for the Associate's diploma in three years and for a degree in six years. By attending classes in summer as well as winter sessions it is possible for evening division students to complete the degree course in four years and the diploma course in two years.

Evening students require two winter sessions, or one winter session and one summer session, to prepare for senior matriculation examinations.

Extra-curricular Activities

STUDENT ORGANIZATIONS. The College encourages and supports student activities and organizations in the belief that through such endeavours and associations much real education may accrue to the students concerned. A Student Council controls all activities of this nature, including athletics, study groups, social affairs, college newspaper ("The Georgian"), etc. Student societies in the day and evening division, respectively are known as the Students' Undergraduate Society and the Evening Faculty Student Society. Annual student society fees are to be found on page 27.

THE FINE ARTS. In order to enrich college life and to aid students in the experience and appreciation of beauty wherever it may be found, examples of fine painting from time to time are displayed, music appreciation hours are arranged and every available opportunity, curricular and extra-curricular, is realized by the College to further this aim.

THE PLAYMAKERS' WORKSHOP. The purpose of this group is to encourage a knowledge and appreciation of the drama and to train students in dramatic techniques, including acting, voice culture and oral expression, stagecraft and play production. Usually two major productions are presented during the academic year, with stage settings and scenery planned and constructed in the drama workshop. Activities of the Workshop have been suspended, however, for the duration of the war.

STUDENT HEALTH PROGRAMME. An active programme of student athletics and health education is available to students in the day division, while more limited facilities are at the disposal of evening students. Participation in some phase of this health education programme is compulsory for all students in the day division.

MILITARY TRAINING. During the academic year 1942-43 arrangements were made for the military training of male students in the day division of the College in the Second Medium (Reserve) Regiment, Royal Canadian Artillery. In accordance with the requirements of National Selective Service Mobilization Regulations every male student in the day division who is found physically fit by the army medical officer must take this training. Training periods are arranged two evenings each week during the academic year (totalling at least 110 hours during the year) and two weeks of training at a military camp are required during the summer immediately following the close of the academic year. Evening division students are not required to take this training, but may do so if they wish. Subject to revision of regulations by National Selective Service, it is anticipated that similar arrangements will obtain during the academic year 1943-44.

WOMEN'S WAR TRAINING PROGRAMME. Women students in the day division are required to participate in some phase of the special war training programme made available for them, the extent of such compulsory participation for each student varying with the degree to which she takes part in other health and physical education activities. In the academic year 1942-43 two extra-curricular courses of instruction were offered in this special war training programme: 1st term—Chemical Warfare and Air Raid Precautions; 2nd term—"Emergencies in War" Training Course of the Canadian Red Cross Society. These or comparable training courses will be available in 1943-44. Additions to the programme may be announced. Women students may obtain exemption from certain phases of this training only by taking part in approved forms of war emergency service or training outside the College.

FACILITIES OF THE COLLEGE

Sir George Williams College and the four Sir George Williams Schools occupy the second and third floors of the Drummond Street Y.M.C.A. building and an annex at 1452 Drummond Street. Accommodation is available for 3,500 students in the various classes of the College and the Schools.

CHEMISTRY LABORATORIES. The main laboratory (I) accommodates 40 students, and laboratory II, for advanced work, accom-

modates 24 students. The tables are equipped with gas, water, and individual lockers which will accommodate more than 750 students. The main laboratory is equipped with A.C. and D.C. electricity. The six fume chambers are provided with shatter-proof glass doors and high velocity exhaust fans.

PHYSICS LABORATORY. Three benches provide accommodation for 20 students and an additional 20 may be accommodated at the same time for physics experiments in the adjoining Electrical Laboratory. Equipment includes apparatus for experiments in general physics, electricity, mechanics, optics and thermodynamics.

ELECTRICAL LABORATORY. The electrical laboratory is wired for A.C. and D.C. electricity, and is provided with a complete equipment for study and experiment in magnetism, general electricity, radio, electrical communication and sound reproduction, including a long range radio receiver and short wave transmitter.

BIOLOGY LABORATORY. Housed in the College Annex, this laboratory is equipped to accommodate 24 students. Compound microscopes and dissecting instruments are supplied for the student's individual use. The large collection of microscope slides covers the fields of botany, zoology, histology and embryology. There is adequate, modern apparatus for experimental work in physiology. Other apparatus includes microtomes, constant temperature oven, microprojector, photomicrographic equipment, and both slide and motion picture projectors. In conjunction with the laboratory there is an extensive teaching museum of charts and models, preserved and mounted specimens, and skeletal preparations.

SCIENCE LECTURE Room. Science demonstration and popular lectures are provided for in this room. It is equipped with tiered seating, tablet arm chairs, modern demonstration desk and appliances, complete projection equipment, including microprojector, and full sets of charts and lantern slides.

THREE ART STUDIOS. Three art studios are available for work in drawing and painting, modelling and sculpture, and all phases of fine and applied art.

DRAMA WORKSHOP. Members of the Playmakers' Workshop and students of the drama are provided with a well equipped workshop in which are designed and built the stage settings used in the College plays.

CLASSROOMS. The 46 rooms of the College are in constant use day and evening. They are well lighted, and are equipped with mechanical ventilation. Three of these rooms bear names in honor of the late D. A. Budge, Esq., the late Abner Kingman and the late C. T. Williams, Esq. The Accountancy room will seat 40 students at special commercial desks.

VISUAL INSTRUCTIONAL EQUIPMENT. In keeping with modern developments in instructional methods, the College has recently greatly increased its equipment for visual instruction. This now includes not only a wide range of charts, models, maps and pictures for basic instruction in the sciences and fine arts, but also extensive projection equipment. This includes a sound motion picture projector, five projection lanterns (two of which are equipped for opaque projection), and two sets of microprojection apparatus. Appropriate sets of many hundreds of slides accompany this equipment. While especially useful in such fields as the fine arts, biology and natural science, this equipment is often used in other courses.

LIBRARY AND READING ROOM. In charge of trained librarians, the newly fitted, open-stack library is increasing its holdings rapidly to keep pace with growing demands of the curriculum and the student body. Reading rooms accommodate at once a hundred students.

CHAPEL. The Captain's Chapel provides, with its Romanesque architecture, stained glass and organ, an atmosphere conducive to quiet meditation and spiritual inspiration.

GYMNASIUM AND SWIMMING POOL. The College has the use of two gymnasiums, swimming pool, handball courts, and other equipment for use by the students in their health and recreation programme.

RESIDENCE. Men students may reside in the Y.M.C.A. dormitory which occupies the same building as does the College. Special student rates may be obtained from the Residence Secretary, 1441 Drummond Street. The residences of the Montreal Y.W.C.A., both within walking distance of the College, are recommended for women students. Particulars may be obtained from the Residence Secretary, 1124 Dorchester Street, West.

CLASSIFICATION OF STUDENTS

(1) **UNDERGRADUATES:** Students who, at the time of registration, meet full admission requirements and enroll with the intention of completing the work required for a degree or diploma are classified as Undergraduates whether they be taking several subjects or only one in any given year.

(2) **PARTIAL COURSE STUDENTS:** Students who, at the time of registration, do not expect to proceed to a degree or diploma are classified as Partial Course Students irrespective of the number of subjects of study they may be following in any given year.

REQUIREMENTS FOR ADMISSION TO THE COLLEGE (FACULTY OF ARTS, SCIENCE AND COMMERCE)

The college reserves the right to refuse admission even when the stated requirements for entrance have been satisfied.

(1) **UNDERGRADUATES:** Admission to the College may be secured (a) by the presentation of an appropriate certificate of graduation from high school, or (b) by fulfilling the special entrance requirements for persons over 21 years of age.

(a) The following certificates are accepted as fulfilling the requirements for entrance to the first year of the College:—

Province of Quebec

- a. The High School Leaving Certificate (Protestant or Catholic).
- b. The graduation diploma of Sir George Williams High School.
- c. The Junior Matriculation Certificates of the several universities.
- d. The graduation diplomas of certain secondary schools.

Other Provinces of Canada

- a. NOVA SCOTIA: The Grade XI Certificate.
- b. PRINCE EDWARD ISLAND: The Second Year Certificate, Prince of Wales College.
- c. NEW BRUNSWICK: Junior Matriculation or High School Leaving.
- d. ONTARIO: The Middle School Certificate, or Grade XII.
- e. MANITOBA: The Grade XI Certificate.
- f. SASKATCHEWAN: The Grade XI Certificate.
- g. ALBERTA: The Grade XI Certificate.
- h. BRITISH COLUMBIA: Junior Matriculation Certificate.

United States

- a. The College Entrance Board Certificate.
- b. The Board of Regents Certificate, State of New York.
- c. The graduation diploma of accredited High Schools.

Other Certificates

Certificates other than those mentioned above may be submitted for examination and evaluation.

(b) Persons over 21 years of age who may not have satisfied the technical requirements for high school graduation but who have the capacity to do college work are admitted as conditioned Under-

graduates in the College by fulfilling the *Special Entrance Requirements for Persons over Twenty-one Years of Age*. Details regarding these requirements may be obtained from the Registrar.

(2) PARTIAL COURSE STUDENTS: In the case of students wishing to enroll for partial courses or unit subjects in the Evening Division, high school graduation is not required, except in the case of those subjects in which successful college work is absolutely dependent upon preliminary work in the same subject taken at the high school level. Certain unit courses in the College, however, are not dependent upon work completed in high school. Students wishing to register for such unit courses, as Partial Course Students, are required, therefore, only to be sufficiently mature to do the work of the course.

While partial course students and students following single courses of interest are expected and encouraged in the Evening Division of the College, only in special circumstances will the registration of partial students be accepted in the Day Division. Where necessary and desirable, however, and upon approval of the application by the Dean, such registration may be made.

Sir George Williams High School

Applicants for admission to the Faculty of Arts, Science and Commerce, whose entrance certificates do not quite meet the requirements, may make up the deficiency in the Evening High School.

APPLICATION FOR ADVANCED STANDING

Students who wish to apply for advanced standing upon the basis of work already completed in other colleges or universities should understand the following conditions:

1. Each application for advanced standing is considered individually, on its merits.
2. A student, who presents evidence of having completed one full year of study in a four-year college, will be admitted, as a rule, to the second year of the College. It is provided, however, that if such student's first-year selection of subjects has not coincided with the curricular requirements of the College, the deficiency must be made up in the second year.
3. Students presenting senior matriculation, senior high school leaving, or upper school certificates will, in general, be given credit in the first year, course for course, for subjects completed. Owing to the special requirements of the curricula of the College, which are listed below, it is not possible for a student to obtain complete first year

standing through presentation of one of the above certificates. Deficiencies may be made up, however, during the remainder of the course provided they are not too great and, further, that the student does the extra work necessary.

4. In order to obtain a degree or diploma in the College, a candidate must do the equivalent of at least one full academic year's work (including the final year) in the College irrespective of the amount of *pro tanto* credit allowed. (In the Evening Division this is interpreted to mean that a student must complete at least five full courses over a period of at least three four-month terms.) This regulation applies to students presenting certification of more than one year's work in another college or university, and also to graduates of Sir George Williams College who may wish to qualify for a second bachelor's degree in a field (Arts, Science or Commerce) other than that in which they were graduated.

5. Except by special permission of the Dean no course or courses will be accepted *pro tanto* for the pandemic courses.

6. Any undergraduate of the College presenting a qualifying certificate for a commission in any branch of His Majesty's Forces will be granted one full course credit in any division (Natural Science, Social Science or Humanities).

ACADEMIC YEAR AND CLASS HOURS

The winter session of the college is divided into two terms. In the day division each term is three and one-half months in length. In the evening division each term is four months in length. The summer session, which is operated in the evening division only, is four months in length. Exact dates marking the opening and closing of the various terms are to be found in the calendar on page six of this announcement.

In most cases three hours of lectures are held in each course each week in the day division. In the evening division the same courses involve only two hours of lectures per week. Fewer lecture hours per week are required in the evening division than in the day division in view of the fact that the academic year is longer in the evening division and that evening students as a rule are older and more mature than day students, and the extra work, if necessary, is made up in assignments completed outside of class. Additional class hours are scheduled for laboratory work where this is included in a course.

The class hours of each course are given in the Day Division and Evening Division timetables, which should be consulted before registering.

EXAMINATIONS AND ADVANCEMENT

All students registered in the College are required to write the regular progress examinations held in January and the final examinations held at the close of the session.

The grades awarded as the final standing in each subject for the academic year are given on the basis of:

- (1) The year's work of the student, week by week;
- (2) The progress examinations;
- (3) The final examinations.

Since June 30, 1943, course grades are awarded according to the following system:

A (90-100%), *B* (80-89%), *C* (70-79%), *D* (60-69%, the lowest clear passing grade), *E* (50-59%, a conditional pass, explained below), *F* (Below 50%, failure), *Abs.* (Absent from final examination), *Inc.* (A provisional category, indicating that a passing grade may be assigned when the student has completed additional required course work. Incomplete courses are finally graded not more than twelve months after the close of the session in which they were taken.)

Until June 30, 1943, course grades were awarded according to the following system:

A+ (95-100%), *A* (90-95%), *A-* (80-89%), *B+* (70-79%), *B* (60-69%), the lowest clear passing grade, *C* (50-59%, conditional pass), *F* (Below 50%, failure), *Abs.* (Absent from final examination), *Inc.* (Course work incomplete).

A student who has obtained satisfactory grades in all but one of his subjects, and has a "conditional pass" (*E* in the new grading system, *C* in the old) in that subject may proceed to the next year of his course without the necessity of writing a supplemental examination. However, if that subject is pre-requisite to advanced work which he expects to take the following year, he is advised to make an effort to improve his standing during the vacation and to pay special attention to that subject during the ensuing year.

A student securing "conditional passes" in two subjects in any given year must pass the supplemental examination in at least one of these subjects in order to progress as an unconditioned student.

In order to secure credit for courses in which "F" grades have been obtained, supplemental examinations in those courses must be written. A student may progress to the following year carrying one such "condition" provided it is not pre-requisite to advanced work to be taken in the higher year, and provided also that he has not

already secured a "conditional pass" in one of his other subjects. This "condition" must be removed, however, within twelve months of the time of the final examination failed, or the course repeated if credit for it is to be secured.

Students securing "F" grades in three or more subjects in any given year are required to repeat those subjects, if credit for them is to be secured, and may not write supplemental examinations in those courses.

Supplemental Examinations

Supplemental examinations are held during the second week of September.

Application to write the September Supplemental examinations must be submitted to the Registrar on the form provided for this purpose, by August 31st. A fee of \$2. per paper is charged for these supplemental examinations, payable at the time of application.

Without the special permission of the Faculty Council credit may not be secured for courses by passing supplemental examinations unless the course has been followed in the regular way during the academic year.

SCHOLARSHIPS AND PRIZES

Abner Kingman Scholarships

Under the terms of a gift made in 1928 by the late Abner Kingman, a series of five scholarships of fifty dollars value each has been established in the evening division of the College. These Abner Kingman Scholarships are awarded annually to five students who have attended the College for at least one year, and who show great promise as students.

D. A. Budge Memorial Scholarships

In memory of the late D. A. Budge, for thirty-nine years General Secretary of the Montreal Young Men's Christian Association, a series of scholarships of varying amounts has been established in Sir George Williams High School from the bequest of the late William Gilman Cheney. These are awarded each year to students of promise graduating from Sir George Williams Elementary School to the Evening High School, progressing from one grade to another in the Evening High School, and matriculating from the Evening High School to the College.

Nathan Lande Scholarship

Given annually by the sons of the late Nathan Lande, on the recommendation of the Faculty Council, to the day division student with the highest grades in second or third year courses, and tenable in the following academic year. The value of the scholarship is \$150.

Entrance Scholarships (Day Division)

FIRST YEAR. In view of the fact that large numbers of able young men and women are being graduated from the high schools of the province each year, many of whom are unable to afford the regular expenses of a college or university course, the Board of Governors of Sir George Williams College makes available each year 20 Entrance Scholarships of \$50 each in Arts and Commerce and \$70 each in Science, tenable in any of the regular programmes of study, including senior matriculation, in the first year of the College (day division). These Entrance Scholarships are to be given to worthy young men and women, residents of the Province of Quebec, on a basis of : (a) standing on the High School Leaving or Junior Matriculation examinations, (b) scholastic ability, and (c) economic need. For full details candidates are referred to the "Announcement of Entrance Scholarships," obtainable at the college office on request.

SECOND YEAR. Only in very exceptional circumstances will an Entrance Scholarship be awarded to a student applying for entrance to second year.

L'Alliance Française Prizes

Awarded annually to students in the College obtaining high standing in advanced courses in French.

Le Prix Villard

Presented by the students of French in the College, 1942-43, in honour of Paul Villard, M.A., D.D., M.D., Chevalier de la Légion d'Honneur, Associate Professor in the Humanities Division, and awarded annually "pour récompenser l'étudiant qui s'est plus intéressé et distingué dans l'étude de la langue et de littérature françaises."

The Board of Governors Medal for Creative Expression

Awarded annually, when merited, by the Board of Governors of the College to the student or students giving evidence of outstanding ability in creative expression in the fine arts,—creative writing, oratory, drawing, painting, drama or music.

First Graduating Class Award

The first graduating class of the Faculty of Arts, Science and Commerce, known as the Guinea Pig Club, a name symbolic of their pioneering experience, makes a presentation, when merited, to the student who is adjudged to have made the most outstanding new contribution, either academic or extra-curricular, to the student life of the College.

The Dean's Prize in Natural Science

Awarded annually to the graduating student in the College who is judged to have done the most satisfactory work in the Natural Sciences.

Association of Alumni Award

Awarded annually, when merited, to the graduating student who, in the opinion of the Faculty Council of the college, has by his activities, achievements and interest, during his term at the college, won the outstanding commendation and respect of his fellows and of the faculty.

REGISTRATION AND FEES

Enrollment must be made personally at the College offices, during the month preceding the opening of the Session (see calendar on page 6) or earlier. Tuition fees are payable at the time of registration, unless permission to do otherwise is obtained from the Bursar.

All students registering in the College for the first time must present a record of previous school and college work with their application for admission. Following this application, the student's proposed course of study must be approved by the Dean before the application can be accepted and registration permitted. Registration should be made immediately upon receipt of this approval. Students will be accepted in order of registration, irrespective of the date of application.

After the opening of the term, students may change their programme of studies only upon the approval of the Dean.

EXTRA COURSES. In the Day Division, courses in addition to the regular programme of 6 courses in first year, 5 in second year, 5 in third, and 5 in fourth, are termed "extra courses". The Faculty Council approves the principle of superior students in the Day Division taking extra subjects for the enrichment of their curricula, and of conditioned students taking extra subjects to make up deficiencies, but only under the following conditions:

(1) No student in the Day Division will be given academic credit for more than the regular number of courses in any one school year, except to make up a deficiency.

(2) A Day Division student without a deficiency in credit may take an extra course only if his previous record indicates his ability to do the additional work entailed. In this case *no* academic credit will be given for the extra course.

(3) In no case may a student in the Day Division be permitted to take more than one extra full course in a given academic year.

The College Office

The College Office is on the third floor of the main building. The office hours are 9:00 a.m. to 9:00 p.m. (Saturday, 1:00 p.m.).

College Bookstore

All books and supplies required may be purchased at the College Bookstore. Students should secure a book-list from the College Office and be sure of the edition required before buying books elsewhere.

FEES—DAY DIVISION

Tuition, per year (exclusive of other fees below).....	\$150.00
Tuition, extra subjects (in addition to regular programme), each full course*.....	20.00
Tuition, partial course students.....	Fee on application
Laboratory fee, payable in addition to tuition, for each subject involving laboratory or practice periods in addition to lectures.....	10.00
Caution Money Deposit (made by each student and re- funded, less breakages and shortages, at close of year)....	3.00
Deferred Payment fee (charged when tuition is paid in two or more installments).....	2.50 to 5.00
Supplemental examinations, per paper.....	2.00
Students' Undergraduate Society, annual fee.....	7.00
Graduation fee (payable on April 1st of graduating year)....	10.00
Withdrawal fee (see page 28).....	2.50 to 5.00

FEES—EVENING DIVISION

Tuition (exclusive of other fees below):

One half-course*.....	\$ 15.00
One full course*.....	30.00
Three full courses*.....	75.00
Additional half-courses*, each.....	7.50
Additional full courses*, each.....	15.00
Laboratory fee, payable in addition to tuition for each subject involving laboratory or practice periods in addition to lectures.....	10.00
Caution Money Deposit (made by each student taking laboratory work, and refunded, less breakages and shortages, at close of year).....	3.00
Deferred Payment fee (charged when tuition is paid in two or more installments).....	1.00 to 5.00
Supplemental examinations, per paper.....	2.00
Evening Faculty Student Society, annual fee (payable by all Undergraduates; optional for Partial Students).....	4.00
Graduation fee (payable on April 1st of graduating year)....	10.00
Withdrawal fee (see page 28).....	1.00 to 5.00

*A full course represents a subject studied for one full academic year of two terms.
A course which continues for one term only, half the academic year, is therefore
a half-course.

Deferred Payments

Although it is contemplated that in most cases fees will be paid in full at the time of registration, arrangements may be made with the Bursar for deferred payments. The ability of the student to pay shall have consideration in all questions regarding deferred payments, and every reasonable effort will be made by the College to enable the student to take advantage of the training offered. In cases of deferred payments, a fee to cover the cost of opening a ledger account on the College books will be charged, and must be paid at the time of registration along with an initial payment on tuition fees.

The College reserves the right to withhold the award of a degree, diploma or transcript of credit to any student whose fees are not paid in full.

Withdrawal and Refund

Students who are forced to withdraw from a course, or from the College are required to notify the College Office in writing and to give their reasons for withdrawal. As the College assumes the obligation of carrying the student throughout the year when the student registers, and as the College provides the instruction and accommodation on a yearly basis, the Board of Governors has ruled as follows:

- (1) Application for withdrawal must be presented within thirty days after discontinuing attendance.
- (2) All tuition credits and refunds shall be made entirely at the pleasure of the College.
- (3) Credits or refunds will be granted only as follows:
 - a. Cash refunds may be granted in cases where students are compelled to withdraw on account of serious and continued personal illness. The application must be accompanied by a certificate from a physician, satisfactory to the College.
 - b. In case a student who is regularly employed during the day is sent out of the city permanently by his employer or compelled to change his working hours so as to prevent his continuing at the College, a refund may be granted, provided the application is accompanied by a statement from the firm, satisfactory to the College.
 - c. Cash refunds may be granted to students who withdraw to join His Majesty's Forces.
- (4) Tuition not refunded or used may, upon securing a certificate of credit from the Bursar, be applied upon subsequent courses pursued in the College, providing such courses are taken within two years of the date of withdrawal of the student.
- (5) In the event of a student's withdrawal from the College, he is charged pro rata for sessions held up to the date of notification of withdrawal, plus a withdrawal fee up to \$5.00 depending upon the total tuition value of the course and the date of withdrawal.

THE DIVISIONS OF THE FACULTY OF ARTS, SCIENCE AND COMMERCE

The various courses of study offered in the Faculty of Arts, Science and Commerce are grouped in three Divisions: The Natural Sciences Division, the Humanities Division, the Social Sciences Division.

The subjects of study included in each of these Divisions of the Faculty are as follows:

THE NATURAL SCIENCES DIVISION (Pages 40 to 51):

- Biology
- Chemistry
- Draughting
- Mathematics
- Physics
- Textiles

THE HUMANITIES DIVISION (Pages 51 to 64)

- English Language and Literature
- Fine Arts
- French Language and Literature
- History
- German
- Greek
- Italian
- Latin
- Philosophy
- Russian
- Spanish

THE SOCIAL SCIENCES DIVISION (Pages 64 to 79):

- Accountancy
- Commerce
- Economics
- Education
- History
- Mathematics
- Political Science
- Psychology
- Sociology

While all students will follow some courses in each of the three Divisions, students who pursue the curriculum in Arts will find that a majority of their courses are in the Humanities Division or the Social Sciences Division, Science students will elect most of their courses from the Natural Sciences Division, and Commerce students from the Social Sciences Division.

CURRICULA

Each year's work of a student must be approved by the Dean before it is considered valid for academic credit.

CURRICULUM FOR THE DEGREE OF BACHELOR OF ARTS

Candidates for the degree of Bachelor of Arts are required to complete twenty-one full courses* (in the Day Division: six in the first year and five in each of the last three years; in the Evening Division: any suitable number each year) in accordance with the following plan:

- a. Four full courses in English. Of these English 101 and 116 must be taken during the first year. (French 104, French-Canadian Literature, may be substituted for a half course in English by those qualified to take it.)
- b. Three pandemic courses: Natural Science 101 and Social Science 101 in the first two years, and Humanities 101 in the third year.
- c. In the Natural Sciences Division, at least two additional full courses but not more than five.
- d. In the Social Sciences Division, at least three additional full courses.
- e. In the Humanities Division, the remainder of the twenty-one courses.
- f. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.

CURRICULUM FOR THE DEGREE OF BACHELOR OF SCIENCE

Candidates for the degree of Bachelor of Science are required to complete twenty-one full courses* (in the Day Division: six in the first year and five in each of the last three years; in the Evening Division: any suitable number each year) in accordance with the following plan:

- a. At least three full courses in English. English 101 in the first year, and two other approved courses.
- b. Three pandemic courses: Natural Science 101 and Social Science 101 in the first two years, and Humanities 101 in the third year.

* A full course represents three hours of class work per week for a full academic year, with the required additional laboratory or studio work. A three-hour course followed for one term only is therefore a half-course.

- c. At least one full course in each of: Biology, Chemistry, and Physics, and at least three full courses in one of these three.
- d. At least one and one-half courses in Mathematics (exclusive of Mathematics 100 and 102).
- e. At least two but not more than five additional full courses in the Humanities and Social Sciences Divisions.
- f. The remainder of the twenty-one courses from the Natural Sciences division.
- g. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.

CURRICULUM FOR THE DEGREE OF BACHELOR OF SCIENCE (COMMERCE)

Candidates for the degree of Bachelor of Science (Commerce) are required to complete twenty-one full courses* (in the Day Division: six in the first year and five in each of the last three years; in the Evening Division: any suitable number each year) according to the following plan.

- a. At least three full courses in English. English 101 in the first year, and two other approved courses.
- b. In Mathematics, at least Mathematics 102 and 103.
- c. In Accountancy, at least Accountancy 101 and 102.
- d. In the combined fields of Economics and Political Science, at least three full courses.
- e. Three pandemic courses: Natural Science 101 and Social Science 101 in the first two years, and Humanities 101 in the third year.
- f. Commerce 105 and at least two additional full Commerce courses.
- g. The remainder of twenty-one courses to be selected.
- h. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.

* A full course represents three hours of class work per week for a full academic year, with the required additional laboratory or studio work. A three-hour course followed for one term only is therefore a half-course.

CURRICULA FOR THE DIPLOMA OF ASSOCIATE

At the conclusion of two years' work in the Day Division, or the equivalent in the Evening Division, a student may be awarded the diploma of Associate in Arts, Associate in Science or Associate in Commerce. In order to be awarded this diploma the completion of eleven full courses* is required, the selection to be made not only in compliance with the curricula below but with a view to realizing the maximum values in the two years of college work. Work done in fulfillment of the requirements for the Associate diploma is, of course, applicable toward a degree.

Curriculum for the Diploma of Associate in Arts

- a. Two full courses in English. (English 101 and 116, to be taken during the first year.)
- b. Two pandemic courses: Natural Science 101 and Social Science 101.
- c. In the Natural Sciences Division, at least one additional course but not more than two.
- d. In the Social Sciences Division, at least one additional course.
- e. In the Humanities Division, the remainder of the eleven courses.
- f. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.

Curriculum for the Diploma of Associate in Science

- a. At least one and one-half courses in English (English 101 in the first year).
- b. Two pandemic courses: Natural Science 101 and Social Science 101.
- c. At least one full course in each of Biology, Chemistry, and Physics, and at least two full courses in one of these three.
- d. At least one full course in Mathematics (exclusive of Mathematics 100 and 102).
- e. The remainder of the eleven courses to be selected from any of the Divisions.
- f. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.
- g. Students preparing for the medical secretaryship may substitute Accountancy 101 for Mathematics, and omit Physics.

* A full course represents three hours of class work per week for a full academic year, with the required additional laboratory or studio work. A three-hour course followed for one term only is therefore a half-course.

Curriculum for the Diploma of Associate in Commerce

- a. At least one and one-half courses in English (English 101 in the first year).
- b. Two pandemic courses: Natural Science 101 and Social Science 101.
- c. At least one full course in Mathematics, exclusive of Mathematics 100. (Mathematics 102 and 103 are recommended for Commerce students.)
- d. In Accountancy, at least Accountancy 101.
- e. In Economics, at least Economics 101.
- f. Commerce 105.
- g. The remainder of the eleven courses to be selected from any of the Divisions.
- h. Students will attend seminars as arranged in the guidance programme of the College and will participate in the health, and military and war training programmes provided. See page 16. No course credit.

SPECIAL PROGRAMMES OF STUDY

Senior Matriculation

Students who wish, at the end of the first year, to transfer to McGill University, may prepare for the appropriate senior matriculation examinations of that University. Before registration they should consult the Registrar regarding their selection of courses.

Preparation for Entrance to Graduate Faculties and University Professional Schools

Students intending to transfer after graduation from Sir George Williams College to a university graduate faculty or professional school should consult the Registrar upon entrance to the College in order that their programmes of study may be planned to satisfy the entrance requirements of the university they expect later to attend, as well as the requirements for the degree or diploma they seek in the College.

It is generally recognized that the obtaining of a bachelor's degree does not necessarily imply the ability to do graduate work or research. However, students who, in the opinion of the Faculty, have exhibited during the period of their course those special abilities which are required in order to do successful university professional school work or research may be given a *Certificate of Recommendation to Graduate Faculties and University Professional Schools*. Students who do not merit this Certificate will not be supported by Sir George Williams College in applying for admission to such professional schools or universities.

Y.M.C.A. Secretaryship Training

Young men and women wishing to prepare themselves as secretaries in the Canadian Y.M.C.A. may do so in the College by choosing for the B.A. degree the maximum possible number of courses in the social sciences division, including the special courses leading to the Diploma in Association Science. Details of these provisions may be obtained from the Registrar.

Specialization in Textile Dyeing

In cooperation with the Canadian Association of Textile Colourists and Chemists, the College offers a group of courses for those engaged in, or preparing for employment in the textile industry. Students who complete the required courses may, if they wish, write the external examinations of the City and Guilds of London Institute for which the College is an official examining centre. A detailed outline of this programme of studies may be obtained on request. These courses also may be included in curricula leading to the diploma of Associate in Science and the degree Bachelor of Science.

Courses for Practical Engineers

Among the scientific and technical courses offered by the College are many which may be helpful to non-graduate practical engineers. Such courses are valuable in advancing technical competence and providing a background of scientific knowledge for work done daily on the job. They may be credited toward the degree of Bachelor of Science in the College. They are of assistance to those who are preparing to write the qualifying examinations of the Corporation of Professional Engineers of the Province of Quebec (P.E.Q.) or other professional engineering bodies. These courses, which may be followed entirely in evening classes, are outlined in a leaflet obtainable at the College office.

Specialization in Accountancy

Any undergraduate in the Bachelor of Science (Commerce) course may specialize in accountancy within the curriculum for the degree.

Those who wish, after graduation in Commerce to qualify for the degree of C.A. (Chartered Accountant) may do so by arrangements made with the Society of Chartered Accountants of the Province of Quebec. Since courses in the degree programme should be chosen carefully throughout for this purpose, students planning to become chartered accountants should consult the Registrar for further details.

It is possible, also, for students of the College to prepare for the examinations of the General Accountants Association which grants the title of C.G.A. (Certified General Accountant). This may be done by making an appropriate selection of unit courses, or by including the required courses in programmes leading to the diploma of Associate in Commerce or to the degree of Bachelor of Science (Commerce). Further information may be obtained from the Registrar.

Specialization in Secretarial Training

The inclusion of courses in stenography and other appropriate subjects in the two-year curricula leading to the diploma of Associate makes possible programmes of study particularly adapted to those wishing to prepare for employment as business secretaries, medical secretaries or legal secretaries. Suggested selections of courses are listed on page 37.

Specialization in Fine or Commercial Art

Outlined on page 36 is a suggested selection of courses designed for those wishing to include specialization in fine or commercial art in a course leading to the diploma of Associate in Arts or the degree Bachelor of Arts.

Specialization in Social Science

Within the curricula leading to the diploma of Associate in Arts and the degree Bachelor of Arts is ample opportunity for specialization, if desired, in social science. A suggested selection of courses with this emphasis is outlined on page 36.

Other Especially Planned Programmes

It is recognized that students may wish to specialize in other fields than those suggested above—in modern languages, literature, history, economics and political science, psychology, sociology, biology, chemistry, mathematics and physics, etc. This is possible, of course, by making appropriate selections within the requirements for one of the degrees or diplomas offered. Students wishing a programme of study different from any of those suggested above or below are invited to discuss their plans with an officer of the College. Students whose mother tongue is other than English particularly are urged to take advantage of the special arrangements which can be made to suit their needs.

Suggested Selection of Courses in the First Two Years

These suggestions as listed below are arranged to suit the schedules of day division students. Evening division students may follow the same outlines by selecting some of the "first year" courses in their first year, the balance of these and some of the "second year" courses in their second year, and the balance of the "second year" courses in their third year.

Curriculum	FIRST YEAR		SECOND YEAR	
	Course	Credit	Course	Credit
ARTS General Course	English 101 English 116 Natural Science 101 Social Science 101 Selected	1 1 1 1 2	English 102 Selected	1 4
ARTS Fine or Commercial Art	English 101 English 116 Natural Science 101 Fine Arts 103 Fine Arts 102-106 (if available) Selected	1 1 1 1 1 1	English 102 Social Science 101 Fine Arts 103 Fine Arts 102-106 (if not previously taken) Humanities 101	1 1 1 1 1 1
ARTS Social Science	English 101 English 116 Natural Science 101 Social Science 101 History, selected Selected	1 1 1 1 1 1	English 102 Biology 101 Economics 101 Psychology 101 Sociology 102 Selected	1 1 1 1 1 2
SCIENCE General Course	English 101 English 116 Natural Science 101 Two of: Biology 101 Chemistry 101 or 102 Physics 101 or 102 Mathematics 101 or 101A	1 1 1 2 An advanced course in Biology, Chemistry or Physics 1 1	Social Science 101 Biology 101 or Chemistry 101 or 102 or Physics 101 or 102 An advanced course in Biology, Chemistry or Physics Selected	1 1 1 1 1 2

Students preparing for entrance to the Faculty of Engineering at McGill University will take the first year of the general course in Science, choosing Chemistry and Physics but not Biology.

Curriculum	FIRST YEAR		SECOND YEAR

MODERN FOREIGN LANGUAGES

Students may take one or more of the following languages as a first year selection. Each language may be taken as a unit course, or as a partial course. Each language may be taken as a unit course, or as a partial course.

OUTLINES OF SUBJECTS

On the following pages are given brief outlines of the various courses of study offered in the College. These courses are offered in both Day and Evening Divisions. Students should consult the requirements of the Curricula (pages 30-38) before making their selections. *Each of these courses may be taken separately, as a unit course, by Partial Course Students in the Evening Division.*

A two-term course continues throughout the whole academic year; a one term course for half the year only.

The College reserves the right to alter without notice the content of any of the courses listed in the following pages, to change the schedule of courses offered, and to cancel any course for which there is insufficient registration.

THE NATURAL SCIENCES DIVISION

Note: Students requesting admission to advanced courses in Biology, Chemistry, Mathematics and Physics must have their courses approved by the professors concerned.

Natural Science 101. General Course in the Natural Sciences

A pandemic course providing an introduction to the basic sciences necessary for an intelligent appreciation of the world of our day. Science is presented as a unity. The aim is to help the individual to see himself in relation to the universe, to free himself from superstition and prejudice, to gain criteria for the estimation of truth and to rely upon established truth for the ordering of his own life, to appreciate the leadership of the specialist in particular and scientific method in general for solving individual and world problems;—in short to guide constructively the beliefs and attitudes of the student. Incidentally the student gains a view of the various branches of science which may help him to choose more effectively his further courses. The subject matter dealt with is as follows: (a) animals and plants, their functions and relations; heredity and environment; adaptative change; man's place in nature; health and disease; man's behaviour; prehistoric man; the development of civilization, culture, industry, etc. (b) the earth in space, the universe; the earth's crust, soil, minerals, rocks, strata, fossils; the nature of matter, energy, radiation, etc.; science applied through machines, etc.; scientific method; the great scientists and their contributions. Lectures, demonstrations and field trips. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Natural Science 102. Principles of Descriptive Geology

The purpose of this course is to introduce the student to the fundamental branches of geology, chiefly as exemplified in his own environment. The principles of mineralogy and petrology are illustrated by local material. Historical geology is also dealt with at some length. Lectures and periodic field trips. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Natural Science 103. Introduction to Descriptive Astronomy

In this course an attempt is made to make the student familiar with modern concepts of the nature of the universe. Lectures and discussion are liberally supplemented by observation. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Natural Science 104. History of Science

The purpose of this course is to allow the student to trace the development of the great scientific movements and discoveries from the earliest times to our day. Emphasis is placed on the interdependence of the various branches of science and the relation of science to social development. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1943-44 and alternate years

BIOLOGY

Biology 101. General Biology

The purpose of the course is to develop an interest in, and understanding of, living organisms. The course includes a study of the main types of plants and animals, their structure, function, inter-relationships, and evolutionary development. A brief introduction is given to the study of heredity, embryonic development, ecology and other aspects of the biological sciences. Considerable stress is laid on the practical work done by the student in the laboratory. Natural Science 101, or the equivalent, should be taken previously or concurrently. Lectures and laboratory. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Biology 102. Genetics and Human Welfare

This course attempts to make the student thoroughly familiar with the principles of heredity as understood by modern biology. It also deals with the application of genetic principles to organisms including man. The biological basis of social problems and social evolution is dealt with at some length. The doctrine of organic evolution and its implications for human life and welfare are also considered. (This course may be taken for credit either as a Natural Science or as a Social Science.) (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Biology 103. Embryology and Histology

A course dealing with the processes concerned in the development of the individual. The material is largely descriptive and comparative but some introduction is made to the field of experimental embryology. The course leads up to and grades into a study of the tissues and organs of the adult. Pre-requisite: Biology 101 or its equivalent, and if possible Biology 106 or its equivalent. Lectures and laboratory. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

Biology 105. General Physiology

A course in functional zoology. The principal physiological processes, nutrition, circulation, respiration, excretion, co-ordination and reproduction are dealt with in a comparative manner. The fundamental similarity of these processes in all animals is stressed. An introduction to the nature of protoplasm and the functioning of the cell is included. The practical study of some of the simpler physiological processes forms the basis of the laboratory work. Pre-requisites: Biology 101, Chemistry 101 and Physics 101, or their equivalents. A knowledge of organic chemistry also is desirable. Lectures and laboratory. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Biology 106. Vertebrate Zoology

The bulk of the course is concerned with the comparative anatomy, inter-relationships and evolution of the chordate animals, although the problems of their development, physiology, ecology and distribution are not overlooked. The course provides a good background for the student proceeding to the study of human anatomy and physiology. In the laboratory, representatives of the principal vertebrate classes are dissected. Pre-requisite: Biology 101 or its equivalent. Lectures, laboratory and field trips. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

Biology 107. Medical Laboratory Techniques, and Terminology

A course in the practical aspects of biological work with particular reference to the medical laboratory and the medical office. Emphasis is placed on the mastery of such procedures as blood-counts, urinalysis and the preparation of microscopic specimens. The student also is made familiar with medical terminology and given practice in medical stenography. Lectures and laboratory. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Biology 108. Ecology

A study of the relations of plants and animals to their environment. The following topics are dealt with: Types of environments and their physical conditions; biological formations, associations and communities; the community as a unit; dominance in the community; community successions, seasonal and ecological; food chains; animal numbers, cycles in numbers; the conservation problem; balance of nature, carnivore-herbivore interactions; biotic control of agricultural pests, etc., soil and water conservation. Pre-requisites: Natural Science 101 and Biology 101 or their equivalents. Lectures and periodic field trips. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

CHEMISTRY**Chemistry 101. Introduction to General Inorganic Chemistry**

The purpose of this course is to give a general background in Chemistry. It may therefore be taken by students without previous study of this subject. A full exposition of the general principles of Chemistry and modern applications of the science to everyday life will be given. Lectures and laboratory. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Chemistry 102. General Inorganic Chemistry

A fundamental knowledge of the principles and theory of inorganic chemistry is given. The course includes the study of the properties of the non-metals, their compounds and uses. Electronic structure of the atom and the periodic classification are employed as a unifying concept. A systematic, comprehensive study is made of the metals, their metallurgy and uses, and their application to modern technology. Only students possessing considerable knowledge of and interest in chemistry are advised to take this course. (Students are not expected to take both Chemistry 101 and 102 but rather to choose whichever is the more suitable with respect to their backgrounds.) Lectures and laboratory. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Chemistry 103. Qualitative Analysis

This course may be taken concurrently with Chemistry 107, or by students who have completed Chemistry 101 or 102 or the equivalent. It includes a discussion of the periodic classification of the elements, the electronic structure of matter, valence, ionization, the Brönsted-Lowry theory of acids and bases, equations, oxidation and reduction, co-ordination theory and complex ions, the equilibrium law and its application to homogeneous equilibria. A quantitative treatment of the equilibria involved in ionization, common-ion effect, buffer solutions and the formation and dissolving of precipitates is given. The application of the law to hydrolysis, complex ions, water, etc., is discussed. The laboratory work consists of the systematic detection of the cations and anions in a series of unknown solutions after a study of the chemical reactions upon which their separation and identification are based. Lectures and laboratory. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Summer term, 1943.

Two terms, every year.

Chemistry 104. Quantitative Analysis

Pre-requisite: Chemistry 103 or its equivalent. This course deals with the principles of quantitative analysis; the balance, weights, volumetric and other apparatus, errors, etc. Gravimetric and volumetric technique are applied to the determination of the common constituents in ores, alloys and other materials. The lectures will review the work on the equilibrium law and its application to ionization, precipitation, etc. A quantitative treatment of its application to hydrolysis, water and pH, complex ions and oxidation-reduction equilibria is given. Modern instrumental methods of analysis such as colorimetry, voltammetry, nephelometry, photometry, etc., are discussed in so far as time will permit. Lectures and laboratory. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, every year.

Chemistry 105. Organic Chemistry

The ground covered is that usually given in a first course in organic chemistry, together with considerable more advanced work in the subject. Lectures deal with the aliphatic and aromatic series, isomerism and stereo-chemistry, determination of the structure of compounds and the mechanism of reactions. Lectures and laboratory. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Note: Chemistry 107, 108 and 109 are intended to give two full college courses in the fundamentals of the theory of chemistry. Chemistry 108 will be pre-requisite to 109 after the year 1943-44.

Chemistry 107. Introduction to the Theory of Chemistry

The material covered in this course includes atomic and molecular structure, and some descriptive chemistry, employing the electronic structure of the atom and the periodic classification as unifying concepts. Also included are the kinetic theory of gases and liquids; solids; solutions and the properties of dilute solutions; chemical equilibrium and ionization. Students who have a strong foundation in high school chemistry and are planning to take advanced work in the physical sciences are advised to take this course in their first year. Lectures and laboratory. (Half course.)

Day Division: 1st term, every year.

Evening Division: Not given 1943-44.

Chemistry 108. Elementary Physical Chemistry

This course includes a more extended treatment of kinetic theory, physical properties and chemical constitution, elementary chemical thermodynamics and chemical kinetics, and their applications to solutions, colloids, homogeneous and heterogeneous equilibria, and electrochemical phenomena. Pre-requisite: Chemistry 102 or 107 or the equivalent. (Half course.)

Day Division: 2nd term, every year.

Evening Division: Not given 1943-44.

Chemistry 109. Physical Chemistry

Thermodynamics and kinetic theory are stressed as inter-related methods of describing the physico-chemical behaviour of matter. The course covers the general properties of gases, liquids, solids and solutions, the colloidal state, homogeneous and heterogeneous equilibria, chemical kinetics, electrical phenomena in chemical systems, and an introduction to photochemistry. Mathematics 105 or its equivalent must be taken previously or concurrently. A good knowledge of mathematics is pre-requisite. Lectures and laboratory. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Chemistry 110. Industrial Chemistry

A study of the application of chemistry to industry, to give a more detailed knowledge than is possible in introductory courses. The mineral acids, important inorganic chemicals, ceramics, fertilizers, paints, electric furnace and coal-tar products, metallurgy, petroleum, soaps, explosives, rubber, textiles and paper will be studied. Motion pictures and special lectures by industrial chemists are included where appropriate. Open to students who have taken Chemistry 101 or its equivalent. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Chemistry 111. Advanced Organic Chemistry

Further study of the aliphatic and aromatic series is made, including theories of ring formation, structure and reactions, exhaustive proof of the structure of benzene; terpenes and essential oils; alkaloids; new synthetic drugs; some heterocyclic compounds, etc. The theoretical principles and mechanism of reactions will be considered. Pre-requisite: Chemistry 105 or its equivalent. Lectures and laboratory. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, 1943-44 and alternate years.

Chemistry 112. Bio-Chemistry

For students who have completed Chemistry 105 or its equivalent and have completed or are taking concurrently Biology 105, this course provides a training in the principles of bio-chemistry. A study is made of the chemistry of and the physiological significance (metabolism) of the carbohydrates, fats, proteins and related substances; the functions of haemoglobin; acid-base balance in the body; a consideration of the energy output and caloric requirements of the human being, as well as the vitamins and their functions. Lectures and laboratory. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, 1944-45 and alternate years.

DRAUGHTING

Note: Only undergraduates may take these courses as Draughting 101, 102 and 103, and they may not apply more than two course credits in Draughting toward a degree or diploma. Partial course students who wish Draughting are referred to Draughting 1, 2 and 3 as listed in the announcement of the evening division of Sir George Williams Business School. There also will be found allied courses in Blueprint Reading, Estimating, Strength of Materials, and Practical Mathematics.

Draughting 101. Elements of Draughting

A practical course designed to give a thorough training in the elements of engineering drawing to those engaged or about to be engaged in machine, aviation, structural, architectural or electrical draughting, including the reading of blue prints, use of draughting instruments and the making of tracings and original drawings. The course includes: selection and use of drawing instruments and materials, lettering, projection drawings, three-view drawings of simple objects, order of pencilling, order of inking, curved work, applied geometry, tangency problems, dimensions and notes, scaled drawings, auxiliary projection, revolution, sectional views, conventional sections, conventional practices and symbols, code for materials in section, working drawings, classes of working drawings, assembly drawings, detail drawings, plant layouts, tabular drawings, commercial practices, chemical and electrical engineering drawings, tracings, blueprinting and other duplication processes, elements of architectural drawings. Lectures and practice. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Draughting 101B. Elements of Draughting

Outline identical with that of Draughting 101. This course is offered, when the demand is sufficient, as a full course commencing in February and continuing through September.

Draughting 102. Advanced General Draughting

An advanced course arranged to suit students in every branch of engineering drawing, in conformity with the best current industrial practices. The course will include the application of geometrical principles in engineering drawing of various types, the ellipse, the parabola, the hyperbola, cycloidal and involute curves, developed surfaces and intersections, developments of elbow pieces, domes, triangulation, intersection of cylinders, cones, intersection of a plane and a surface of revolution, fastenings (bolts, screws, rivets, riveted joints, keys and springs). pipe drawings, fittings and valves, cams, types of cams, cam motions, cam diagrams, cam layouts, technical sketching, pattern, foundry, forge and machine shop drawings, axonometric, oblique and perspective drawing. Lectures and practice. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Draughting 103. Machine Drawing and Design

This course is designed to consolidate the work previously done in engineering drawing, introducing the practical elements of machine design. The course includes further practice in the drawing of numerous machine parts and the study of definitions used in strength of materials, simple stresses, strength of bolts and nuts, strength of riveted joints, welded joints, shafts, axles, journals, bearings, tolerances, classification of fits, strength of pipes and thin-walled cylinders, pipe joints, expansion joints, supports for pipe lines, belts and pulleys, belt horsepower, rules for installation, cone pulleys, friction wheels, toothed gearing, types of gears, design of gears, material used in gears, crank shafts, crank pins, eccentrics, connecting rods, piston rods, eccentric rods, pistons, crossheads, stuffing boxes, materials used in the construction of machines. Lectures and practice. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

MATHEMATICS

Mathematics 100. Elements of Mathematics

This course is offered for students who have not had the usual pre-college training in mathematics. Subject matter: Elementary algebra up to and including simultaneous quadratic equations, and indices; certain theorems and problems in plane geometry. (This course, when taken, will not satisfy the requirements in Mathematics for the diploma of Associate in Science or Commerce, or the degree of Bachelor of Science, but may be credited as an option in the Natural Sciences Division.) (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Mathematics 101. Algebra and Trigonometry

(a) Algebra: Ratio; proportion; variation; arithmetic, harmonic and geometric progressions; theory of quadratics; permutations and combinations; the binomial theorem; graphical algebra. (b) Trigonometry: Definition of trigonometric functions; identities; functions of multiple angles; transformation of sums and differences of functions; solution of triangles by use of four-place logarithms; inverse trigonometric functions. (c) Tutorial: Supervised practice in the solution of problems in algebra and trigonometry. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Mathematics 101A. Analytic Geometry and Advanced Algebra and Trigonometry

This course is offered as a first college course in mathematics for students who have a satisfactory knowledge of high school intermediate mathematics, and as a second course for students who have completed Mathematics 101 or its equivalent and may not wish to take a more advanced course in their second year. (a) Analytic Geometry: Straight line and circle, change and rotation of axes. (b) Algebra: Review of variation, theory of quadratics, permutations and combinations, and the binomial theorem, and, in addition, graphical algebra and functional notation, partial fractions, complex quantities, elements of the calculus. (c) Trigonometry: Review of sum and difference formulae and solution of triangles by logarithms, and, in addition, inverse functions, general values, limits and approximations, DeMoivre's theorem. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Mathematics 102. Mathematics of Finance

See the Social Sciences Division, page 74. (This course may not be taken for credit as a Natural Science, nor to satisfy the requirements in Mathematics for the diploma of Associate in Science or the degree of Bachelor of Science.)

Mathematics 103. Statistical and Graphical Methods

The elementary principles of statistical method as applied in the scientific study and interpretation of economic and social phenomena. The course includes the study of averages, percentiles, measures of dispersion and central tendency, tabulation, frequency distribution, frequency curves, correlation, index numbers, graphical representation and classification, etc. (Half course.)

Day Division: 2nd term, every year.

Evening Division: Summer term, 1943.

2nd term, every year.

Mathematics 104. Analytic Geometry

This course covers the analytic geometry of the straight line, circle, parabola, ellipse and hyperbola and curve tracing in both Cartesian and polar-coordinates. The use of determinants is introduced early in the course. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Summer term, 1943.

1st term, every year.

Mathematics 105. Calculus

Subject matter: Constants, variables, definition of a continuous function; limits, the derivation of simple algebraic functions, differentiation of exponential, logarithmic, and transcendental functions; inverse trigonometric and hyperbolic functions; application of derivatives to physical problems, partial differentiation, integration, application of integration to areas, volumes and lengths of plane curves; applications to problems of physics and physical chemistry. It is recommended that students wishing to take this course should take Mathematics 104 previously or concurrently. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Mathematics 106. Higher Algebra

This course is intended primarily for the student who wishes to prepare for advanced study in either pure or applied science. Subject matter: Partial fractions, probability, theory of equations, Taylor's theorem, the general cubic and biquadratic equations, complex quantities, determinants and elimination, convergence of infinite series, exponential and logarithmic series, limiting values of functions. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

Mathematics 107. Differential Equations

For students who have completed Mathematics 105 or its equivalent. Subject matter: Differential equations of the first order, homogeneous equations, envelopes, singular solutions, the linear differential equation, complementary function, particular integrals, simultaneous differential equations, equations of the second order, Clairaut's Form, Legendre's equation, Bessel's equation. Applications to problems of physical chemistry, dynamics and electricity. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1943-44 and alternate years.

Mathematics 108. Advanced Calculus

For those who have completed Mathematics 107 or its equivalent. Subject matter: Infinite series, Fourier series, partial differentiation, multiple integrals, line integral, partial differential equations. Applications to problems of physics. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, 1943-44 and alternate years.

PHYSICS**Physics 101. Introduction to General Physics**

This course consists of mechanics, hydrostatics, molecular physics, sound, heat, magnetism, electricity, light, and their measurement and applications. It is intended primarily for students possessing little or no previous knowledge of physics. The broad principles of the subject, and their daily usefulness, will be discussed. Mathematics 101 or the equivalent must be taken previously or concurrently. Lectures and laboratory. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Physics 102. General Physics

This course provides a background for (1) higher work in pure physics, (2) industrial applications in structural, mechanical electrical engineering, (3) general understanding and appreciation of scientific literature. It covers the same field as physics 101 and, in addition, considerable work omitted from the usual first year college course. More difficult problems are solved and students may take both Physics 101 and 102 for credit. Able students may take Physics 102 as a first college course, although pre-college courses in physics are usually essential for the satisfactory completion of this course. Lectures and laboratory. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Physics 103. Radio and Sound Reproduction

A practical course on the principles underlying sound reproduction and electrical communication. The following subjects are treated without resort to involved mathematics: Alternating current theory, vacuum tubes, radio receivers and transmitters, test instruments, amplifiers, trouble shooting, photo electric devices, theatre sound systems, public address systems, inter-office communication equipment. Laboratory and lectures. (Half course in Summer, 1943; full course thereafter.)

Day Division: Not given 1943-44.

Evening Division: Summer term, 1943.

Two terms, every year.

Physics 104. Statics and Dynamics

Subject matter: parallelogram of forces, couples, conditions for equilibrium of rigid bodies, friction, graphical methods centre of gravity, kinematics, simple pendulum, compound pendulum, d'Alembert's principle and applications to motion of a rigid body, moments of inertia. Mathematics 105 or its equivalent must be taken previously or concurrently. Lectures and laboratory. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Physics 105. Electricity and Magnetism

Foundations of electrostatic and electromagnetic theory, electrical measurements, including use of post office box, precision potentiometer, standard resistance, simple A. C. bridge measurements, static characteristics of the triode valve, and use of cathode ray oscilloscope. Mathematics 105 or its equivalent must be taken previously or concurrently. Lectures and laboratory. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Physics 106. Light (Optics)

Subject matter includes geometrical optics, Fermat's principle, dispersion, derivation of the lens formulae, cardinal points of a lens system, the phi-diagram, diffraction grating, spectrometer, spectroscope and elements of spectroscopy. Mathematics 105 or its equivalent must be taken previously or concurrently. Lectures and laboratory. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

Physics 107. Thermodynamics and Kinetic Theory

Kinetic theory of gases, transport phenomena, applications of kinetic theory to viscosity and conductivity, the two laws of thermodynamics, specific heats, isothermals and adiabatics. Carnot's cycle, entropy, the Carnot-Clausius equation, thermodynamics of a fluid, change of state. Van der Waal's equation. Mathematics 105 or its equivalent must be taken previously or concurrently. Lectures and laboratory. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Physics 108. Radio Theory and Design

An advanced general radio course for students who have completed Physics 103 and Mathematics 101, or the equivalent. This course includes the theory and practical study of: Noise measurement, acoustics, television, frequency modulation systems, transmission networks, equalizers, speech filters, harmonic analysis, phase distortion, speech amplifier design, radio measurements, simple transmitter design, electronic control. Lectures and laboratory. (Half course.)

Day Division: Not given 1942-43.

Evening Division: Two terms, every year.

Physics 109. Nuclear Physics

An historical approach to nuclear physics; the charge on the electron, determination of the ratio of charge to mass for the electron, photoelectric emission, thermionic emission, conduction of electricity through gases, positive rays and isotopes, the mass spectrograph; alpha, beta, and gamma rays, acceleration of ions, X-radiation, artificial transmutation. For students who have completed Mathematics 105 and any two of Physics 104, 105, 106, 107, or their equivalents. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Physics 111. Strength of Materials

For students who have a knowledge of algebra, geometry and trigonometry. Subject matter: The strength and properties of materials of construction; stress and strain; the behaviour of materials under simple stresses; problems involving graphical determination of simple stresses. (Only undergraduates may take this course as Physics III. Partial course students are referred to Strength of Materials as listed in the announcement of the evening division of Sir George Williams Business School.) (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

TEXTILES

Note: Only undergraduates may take these courses as Textiles 101, 102, 103 and 104. Partial course students are referred to Textiles 1, 2, 3 and 4, and also to Textiles 11 (Textile Construction and Design), as listed in the announcement of the evening division of Sir George Williams Business School.

Textiles 101. Technology of Fibre

The course includes the following topics: Requirements of a textile fibre; classification of commercial fibres, cellulose, protein and miscellaneous; and the study of the important commercial fibres with reference to original or manufacturing methods, general properties, uses in standard fabrics, precautions in wear and handling, introduction to colour properties and fastness. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Textiles 102. General Dyeing

General dyeing is studied under the following headings: water, dyeing machinery, chemicals used in dyeing, dyestuffs considered from the point of view of their dyeing properties. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

Textiles 103. Finishing Operations and Dyestuffs Laboratory Methods

Subject matter includes: Printing of textiles, machines and methods, including thickeners, dyestuffs, and chemicals used in the printing trade; finishing of textiles, including machinery, methods, and chemicals used; laboratory methods of identification of dyestuffs in substance and on the fibre, also laboratory methods of testing dyestuffs. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, 1943-44 and alternate years.

Textiles 104. Advanced Textile Dyeing

A course for those who have completed Textiles 101, 102 and 103, or the equivalent. (Men with extensive experience in the textile industry may be considered to have the equivalent.) It is designed to bring the student up to date on new developments in the field since his completion of the previous courses, such as: new developments in dyestuffs and methods of dyeing and printing textiles; new fibres; new finishing compounds; new auxiliary products (wetting agents, detergents). It deals also with the fundamentals of fibre structure and the theory of colour perception and colour matching, topics not included in previous courses. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, 1944-45 and alternate years.

PSYCHOLOGY**Psychology 101, 102, 103, 104, 105, 106, 107, 108**

(See the Social Sciences Division. Not more than one course in Psychology may be taken for credit as a Natural Science.)

THE HUMANITIES DIVISION**Humanities 101. General Course in the Humanities**

This pandemic course brings the student into immediate contact with as many as possible of the masterpieces of thought and art of our cultural ancestors. The humanities are concerned with man's attempts to understand and feel at home in the world through magic, religion and philosophy. They are also concerned with man's expression of fundamental meanings and values particularly in literature, music, and art. The student is encouraged to understand the historical and institutional setting from which a given body of art or literature came, or a particular school of thought developed. The principal emphasis, however, is on the intellectual, artistic and emotional values and implications. While all of the reading required in this course may be done in English, students who can do so are encouraged to read in other languages as well. The treatment is such that a given student may draw upon the subject-matter of his whole course, as well as from the content of this subject itself, in his preparation and study. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Humanities 102. French-Canadian Life and Letters

The purpose of this course is to provide an introduction to the art, folklore, literature, social institutions, philosophy and way of life of the French-Canadian. In addition to the regular lectures, from time to time French-Canadian educationists and professional men are invited to act as guest lecturers on various aspects of French-Canadian culture. The programme also includes trips to educational institutions, museums and libraries, and a prescribed reading list. All lectures and readings are in the English language. Lectures by guest speakers are open to all students of the College as well as to the general public. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

ENGLISH**English 100. English Language and Literature**

This course is designed for students who have completed secondary school or the equivalent in a language other than English and for whom, therefore, English is a secondary tongue. It attempts to provide sufficient facility in English to enable such students to study with profit in that language and to express themselves adequately. The course includes: (a) English grammar and idiom, (b) Composition and oral expression, (c) Introduction to the masterpieces of English literature, with selected readings from the best known authors. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

English 101. English Composition

Advanced instruction in English composition with the purpose of enabling the student to express himself in a clear, natural and interesting way. Special attention is given to diction, vocabulary, spelling and the fundamental principles of effective composition. It is expected that this course will be completed in the first year, but provision is made for students who need additional coaching and practice to continue this study through the second year. Lectures, class work and periodic assignments are designed to train the student in the use of the library, the taking of lecture notes and the preparation for and writing of examinations. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

English 101A. English Composition

Outline as for English 101. Given as a half course up to and including the Summer term, 1943.

English 101B. Survey of English Literature

See English 124.

English 102. English Literature of the Nineteenth and Twentieth Centuries

To provide an understanding and appreciation of the English literature of the twentieth century, its origins and trends, the work of this course includes a study of the important authors of the past hundred years. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

English 103. American Literature

A detailed survey of the large body of American prose and poetry is the object of this course. In order to provide background, the course will commence at the early colonial period, but special study will be made of nineteenth and twentieth century writers. Attention will be paid to current trends in American literature. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years

English 104. Political, Economic and Social Literature

For students whose primary interest is in the social sciences, the course studies those literary works which, throughout the development of modern civilization, have contributed most to the advance of political, social and economic thought. A literary background is thus provided for the evaluation and appreciation of current writing in these fields. Students are advised to complete Social Science 101 or its equivalent before taking this course. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years

English 105. Readings in the Literature of Science

For students whose primary interest is in the natural sciences, this course aims at a study of those authors in English Literature who have dealt with scientific subjects. Many of the great literary figures of both past and present are included in this list, so that the literature of science provides not only an interesting field of study but an orientation into literature for the science student. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years

English 106. Précis Writing, Commercial Correspondence and Reports

See English 118, Commercial Correspondence, and English 119, Reports, and Précis Writing.

English 107. English Literature of the Seventeenth and Eighteenth Centuries

A study of the major trends in the English literature of the seventeenth and eighteenth centuries, with particular attention to the important authors. (Full course.) (Note: The course numbered English 107 prior to the year 1942-43 is that which is now listed as English 120.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years

English 108. Shakespeare and the Elizabethan Drama

A general survey of the golden age of English drama, with a detailed study of the works of William Shakespeare. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

English 109. Canadian Literature

This course provides for the study of Canadian prose and poetry written in English. A short survey is given of Canadian literature in the French language. Particular emphasis is placed on those writers who have contributed literature about the Province of Quebec; and to those who have attained international notice and repute. (For a similar and supplementary course in French, see French 104.) (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

English 110. World Literature—Classical and Medieval

Through the medium of the best English translations, this course attempts to give the student a clear knowledge and appreciation of the great masterworks of thought and expression that are an important part of his cultural heritage from the Ancient World and the Middle Ages. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: Summer term, 1943.

1st term, 1944-45 and alternate years.

English 111. Contemporary English Literature

For those who have completed English 116 or 124, and 102, or the equivalent, and wish to make further study of twentieth century writers in the English language. Special attention is paid to the trends of modern literature as exemplified by the most recent publications. Students are given ample opportunity to study review methods and practice these both orally and in writing. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

English 111B. Criticism of Modern Literature

Evaluation and criticism of modern writers. Special attention is paid to an examination of the validity of their sources and the adequacy of their backgrounds for the topics they treat. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

English 112. Creative Writing

For advanced students with special interest and ability in written expression, instruction will be given in the various literary forms. Each student will be encouraged and assisted to develop the form of expression in which he shows most promise. Instruction will be individual in so far as this is possible. This course is limited to students who have demonstrated their ability to write during their first two or three years in college. (Half course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

English 113. Advanced Study of Selected Period or Author

Fourth year students who have completed successfully English 116 or 124, and 102, or the equivalent, and who wish to make an advanced study of a selected period or author will be admitted to this course. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

English 114. Byways in Literature

A seminar course in which the material is selected by the student, and where the emphasis lies upon venturesome reading and reading for pleasure. Each student is encouraged to seek a clarification of the values in his everyday reading through the books he elects to study for this seminar. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

English 115. World Literature—Modern

A course complementary to English 110, which attempts to extend the literary experience of the student beyond the confines of his mother tongue, and of those secondary languages which he is ordinarily able to learn. Through the medium of the best English translations, a study will be made of the outstanding literature of other modern languages, including the French, German, Russian, Italian, Spanish, and Scandinavian. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: Summer term, 1943.

2nd term, 1944-45 and alternate years.

English 116. Introduction to Modern Literature

This course attempts to develop greater interest in English literature by introducing the student to the outstanding writers of the present century and to earlier writers who have contributed literary works of permanent value to the world in which we live. The course is designed as an introduction to the study of English literature in college and is not suitable for students who have taken English 124 or 102 or the equivalent. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

English 117. The English Bible

A brief study of the origin of the various translations of the Bible is followed by a consideration of its importance in the cultural life of the English-speaking peoples. Particular attention is then given to certain parts of the text, particularly the prophets, the psalms and the synoptic gospels. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

English 118. Commercial Correspondence

Advanced instruction is given in commercial correspondence, with particular emphasis on the requirements of the General Accountants Association. Actual practice and constructive criticism are included. Types of letters covered include applications for positions, inquiries and orders, adjustments and complaints, collections, and sales. Students are coached, also, on the techniques of dictation and are given opportunities for practice. (Half course.)

Day Division: 1st term, every year.

Evening Division: 1st term, every year.

English 119. Reports, and Précis Writing

Advanced instruction is given in report writing, précis writing and other similar forms of written expression. After a general introduction, accompanied by practice in the basic principles of writing reports, précis, minutes, news articles and other special forms, an effort is made to cater to the particular needs of each student. Class members are encouraged to co-ordinate their assignments with their other studies or their daily work. (Half course.)

Day Division: 2nd term, every year.

Evening Division: 2nd term, every year.

English 120. Public Speaking

The aim of this course is to develop in the student the ability to express himself more effectively in every day life, as well as giving practice in speaking before groups of people. Extensive drill in outlining speech material for original and logical presentations. A study of the motivating forces in audiences, and methods of establishing contact between speaker and audience. Instruction in the preparation of speech material and constructive criticism of its delivery. Weekly practice in application of principles involved. (Half course.)

Day Division: 1st term, every year.

Evening Division: 1st term, every year.

English 121. Short Story Writing

A practical course in the writing and marketing of short stories, together with a study of the general problems of writing fiction. Lecture, discussion, and criticism of written work. A critical analysis of current fiction. This course is open to any who, in the opinion of the instructor, are able to profit by it, regardless of their previous formal education. Students who have already taken English 101, and English 102, 116 or 124, or the equivalent, may take this course for credit. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, every year.

English 122. Short Story Writing, Advanced Course

Students who have taken English 121 or its equivalent may enroll for a second term's study. More intensive seminar work, analysis of stories, and discussion of the student's writing problems. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

English 123. Public Speaking, Advanced

The course is intended to give further practice and experience to those who have had previous public speaking training, or who have had some public speaking experience and feel the need for further improvement. Besides a review of the basic principles of speech making, the course includes formal speeches, speeches on controversial subjects, debate speeches, political speeches, etc. Opportunity is given every student to obtain experience in each of the above, followed by personal criticism from the instructor. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

English 124. Survey of English Literature

A survey is made of the development of English literature from the fourteenth century to the nineteenth. An intimate acquaintance with the work of important authors of various periods is acquired, as well as an understanding of literary history. (Full course.)

Day Division: Not given, 1943-44.

Evening Division: Two terms, every year.

THE FINE ARTS**Fine Arts 101. The Understanding and Appreciation of Music**

To enable the student to understand and appreciate the great music of the world, and to develop taste and discrimination in music without the necessity of learning to play an instrument. The work of the course consists to a great extent in the actual hearing and analysis of the various types of music and composers, and in musically illustrated lectures and discussion. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Fine Arts 102. The Understanding and Appreciation of Art

The intelligent appreciation of art, based upon an intimate acquaintance with the great art of the world in the realm of sculpture, architecture and the pictorial arts, is the ultimate objective of this course. Actual study of the artistic masterpieces and of the work of various artists leads to an understanding of the fundamental principles of artistic expression. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: Summer term, 1943.

1st term, 1944-45 and alternate years.

Fine Arts 103. Studio Course in Drawing and Painting

For undergraduate students who wish to acquire skills in drawing, sketching, water colour, oil, pastel, etching, etc., as part of their college programme, studio work is provided. As instruction is individual, this course may be taken by advanced students as well as by those who have had no previous instruction in art. As Fine Arts 103a, 103b, and 103c, this course may be taken for credit each year for as many as three years. (Partial or unit course students wishing to study art will register in Sir George Williams School of Art. See separate announcement.) (Half course or full course.)

Day Division: 1st term, 2nd term or two terms, every year.

Evening Division: 1st term, 2nd term or two terms, every year.

Fine Arts 104. The Theatre as a Reflection of the Life of its Time

Study of the development of theatrical production and the drama brings before the student the whole shifting scene of manners and customs, ideals and moral standards of the ages. This course traces the development of the theatre from the time of the Greek choragic dance to the modern talking picture and legitimate stage, showing at each step how the culture of that age has been condensed and reflected in the vital and permanent art form of the theatre. (Half course).

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Fine Arts 105. The Technique of Play Production

A study of the fundamental theories of the aesthetics of the theatre and their relationship to the arts contributing to production. Students will participate in a practical programme of productions which will entail work in acting, staging, voice production, pantomime, make-up, lighting and scenic design. Two plays will be enacted and staged by the students each year. Lectures and practice. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Fine Arts 106. Art in Daily Living

A practical study of art, taste, and beauty as they directly affect our daily environment. An attempt is made to reach satisfying values and to attain a fundamental knowledge of the principles whereby they may be brought to realization in the planning of homes, personal costumes and accessories. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Fine Arts 108. Studio Course in Modelling and Sculpture

For undergraduate students who wish to acquire skills in modelling and sculpture, as part of their college programme, studio work is provided. As instruction is individual, this course may be taken by advanced students as well as by those who have had no previous instruction. As Fine Arts 108a, 108b, and 108c, this course may be taken for credit each year for as many as three years. An additional tuition fee is charged undergraduates taking this course, details of which may be obtained from the Bursar. (Partial or unit course students wishing to study modelling and sculpture will register in Sir George Williams School of Art. See separate announcement.) (Half course or full course.)

Day Division: 1st term, 2nd term or two terms, every year.

Evening Division: 1st term, 2nd term or two terms, every year.

FRENCH**French 101. French Language and Literature**

This course aims to give not merely advanced theoretical knowledge of French grammar and syntax, but actual ability in speaking and writing the language as well as a general study of the literature and history of France. As much as possible, instruction is given in French. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

French 102. Modern French Literature

(a) A more intimate acquaintance with French culture through a study of the literary thought of modern France, its origins and its nineteenth and twentieth century trends. (b) Composition: Advanced instruction in composition with the purpose of enabling the student to write the French language in a clear, correct and natural manner. Translation into French of moderately difficult English passages. Instruction will be conducted entirely in the French language. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

French 103. A Study of French Culture

This course treats of those elements which have contributed to, and form an integral part of, that distinctive thing which is recognized as French culture. It includes a study of the social philosophy and organization of medieval and modern France and French Canada, the art, music, drama, education, general mores and folkways of the various social groups, etc. All instruction and reading given in the French language. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

French 104. French-Canadian Literature

A study of Canadian literature written in French. Books about Canada and her people from the beginning of the French regime to the present day, written by Canadians and others, in French, form the basis of this course. (For a similar and supplementary course in English, see English 109.) This course may be substituted for a half course in English in satisfying the requirements for the Bachelor of Arts degree. (Half course.)

Day Division: 2nd term, every year.

Evening Division: 2nd term, every year.

French 105. Contemporary French Literature

A study of modern French drama, poetry, novel and newspaper writing. The course provides a complete survey of French literature in the twentieth century and its influence on the trend of the modern French social, political and economic life. Special attention is given to the study of modern French literary expression in comparison with the literary expression of other countries. All instruction and reading given in the French language. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1943-44 and alternate years.

French 106. Composition, Public Speaking and Debating in the French Language

(a) Advanced instruction in French composition and creative writing. Such instruction will be given to enable students to write the French language in a correct and literary way, using chiefly as material the subject matter of lectures. Translation into French of advanced English literary passages. (b) Extensive drill in using the French language orally to develop ability in using the language in an intelligent way as a vehicle of expression on the platform. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, 1943-44 and alternate years.

French 107. French Seminar in Oral and Written Expression

(a) Intense seminar work based on a study of the language used in contemporary French plays and novels. Analysis and discussion. (b) Discussions on the subject matter of class lectures on the trend of international political events. (c) Advanced French composition. Description, story writing, essays, criticism, newspaper editorials, etc. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

GERMAN**German 101. Introductory Course in German Language**

A beginner's course in the German language which is designed, in one year, to make the student conversant with the grammar, pronunciation and ordinary vocabulary of the language, able to read from the less difficult authors, and able to write simple essays and letters. Emphasis is placed upon learning to speak the language, as well as to read and write it. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

German 102. German Language and Introduction to Literature

Advanced instruction in the language and an introduction to German literature. Emphasis upon idiom and usage in conversation and composition. A survey is made of the classical and modern periods in German literature and of other phases of Germanic culture. Representative readings from the works of the great writers in each period. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

German 103. German Literature

Following the work of German 102, a more intensive study of the German writers of the classical and modern periods with a wider range of assigned readings in both poetry and prose. As much as possible, all lectures and class work are conducted in the German language and special conversational hours are arranged to cultivate fluency and style. (Full course.)

Day Division: Not given, 1943-44.

Evening Division: Two terms, 1943-44 and alternate years.

German 104. The German Classics

Correlated with a continued emphasis upon developing fluency in the use of the language, this course makes a detailed study of the German classics, particularly the works of Goethe and Schiller. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

German 105. Modern German Literature

A detailed study of modern German culture and the works of modern German authors, including novels, short stories and poetry. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

German 106. German Seminar in Oral and Written Expression

Intensive written and oral work for advanced students of the language. As basis for discussion, the reading of contemporary German novels and periodicals. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

German 107. Scientific German

For students who have already taken German 101 or its equivalent. This course will deal particularly with the vocabulary and usage pertinent to the physical and social sciences, and provide further practice in written and oral expression. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

GREEK**Greek 101. Introductory Course in Greek**

The purpose of this course is to enable a student, in one year, to gain an adequate knowledge of Greek grammar and syntax and to read simple passages of Greek quickly and accurately. (Full course.)

Day Division: Two terms, every year.

Evening Division: Not given 1943-44.

Greek 102. Greek Language and Literature

The purpose of this course is to complete the study of Greek grammar and syntax begun in Greek 101, and to enable students to read with greater accuracy and understanding by a wider study of Greek authors. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Not given 1943-44.

HISTORY**History 101, 102, 103, 104, 105, 106, 107**

See the Social Sciences Division.

ITALIAN**Italian 101. Introduction to the Italian Language**

An introduction to the Italian language, including the elements of grammar but with an emphasis on conversation. It is expected that the course will be useful to students of music as well as to those who are interested because of Italy's role in current world events. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, 1943-44 and alternate years.

LATIN

Latin 101. Latin Composition and Classics

Advanced instruction in Latin prose composition and syntax with practice in sight translation. The course also includes translation and literary interpretation of prescribed selections from the Latin classics in poetry and prose. (Full course.)

Day Division: Not given, 1943-44.

Evening Division: Two terms, every year.

Latin 102. Latin Literature

The purpose of this course is to provide students, interested in the subject, with a wider and deeper knowledge of the Roman people, their history, life and literature, by the reading of selected works of the best known Latin writers of the Late Roman Republic and the Early Roman Empire. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

PHILOSOPHY

Philosophy 101. Introduction to Philosophy

A study of the leading types of philosophic conception; materialism, idealism, realism, pragmatism, rationalism, empiricism, monism, dualism; and of the problems and methods of philosophy, relating them to and distinguishing them from other kinds of human interest and activity, such as science and religion. The aim of the course is to aid students in the construction of a tenable world-view for themselves. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Philosophy 102. Great Philosophers, Ancient and Modern

This course aims to make the student conscious of his own intellectual heritage by means of a first-hand acquaintance with the thought of those philosophers, from Plato to the present day, who have been most influential in the moulding of the Western mind. It will also illuminate the character of philosophic problems by showing how they persist through a variety of forms, and are restated from age to age. Readings, lectures and discussions. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

Philosophy 103. Philosophy of Education

See Education 101.

Philosophy 104. Philosophy of Education, Advanced Course

See Education 102, Adult Education.

Philosophy 105. Social and Political Philosophy

See History 107, History of Social and Political Ideas.

Philosophy 106. Logic and Scientific Method

Consideration of the scope of logic, the doctrine of terms and propositions, mediate and immediate inferences and other types of argument, the nature of induction, methods of explanation, the fallacies which occur in reasoning, and the relationship of logic to philosophy and science. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Philosophy 107. Philosophy of Ethics

Consideration of the problems of human conduct from the standpoint of morality, the psychology of ethics, theories of the moral standard, the objectivity of moral values, personality and freedom, rights and duties, with particular emphasis upon the social application of moral principles. (This course may be taken for credit in either the Humanities Division or the Social Sciences Division.) (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

RUSSIAN

Russian 101. Introduction to the Russian Language

An introduction to the Russian language, combining conversation with essential grammatical rules, selected exercises and reading material. Through this course the student is expected to gain a command of the Russian idiom, a working knowledge of grammar and a foundation for later reading of literary and commercial writing. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

SPANISH

Spanish 101. Introduction to the Spanish Language

A beginner's course in the Spanish language, which is designed in one year to make the student conversant with the main grammatical principles, pronunciation and ordinary vocabulary of the language. Practice is given in reading, writing and conversation, particular emphasis being placed on oral work. In the second term classes are conducted as far as possible in Spanish. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Spanish 102. Spanish Language and Literature

In this course conversation and reading are continued and more work is offered in translation and composition. Included also are readings from Spanish literature, designed to aid in the development of effective expression in the language. As far as possible all classes are conducted in Spanish. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Spanish 103. Latin American Culture

A survey of the culture of Latin America. Translation, composition and essay-writing of an advanced character. Ample opportunity will be given for conversational practice and self-expression in the language, to which particular importance is attached. All lectures will be conducted in Spanish. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

THE SOCIAL SCIENCES DIVISION**Social Science 101. General Course in the Social Sciences**

This pandemic course has the same point of view and objectives with regard to the social sciences as Natural Science 101 has regarding the physical sciences. An attempt is made to enable the student to view contemporary society objectively by giving him an understanding of the origins and development of modern civilization. The student is encouraged to develop his thinking about the society in which he lives and his part in that society. The subject matter of the course is drawn from selections of the classical works on man's economic and social life as well as from modern sources and includes an integration of evidence from the fields of anthropology, sociology, psychology, history, economics, political science and social philosophy. As one of the problems of contemporary society, marriage, home-making and sex education are studied. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

ACCOUNTANCY**Accountancy 101. Principles and Practice of Accountancy**

An introductory course in accountancy in which are presented the fundamental principles of the subject with particular emphasis upon the application of those principles through modern bookkeeping procedure. It includes: Single and double entry bookkeeping, origin, records maintained, statements produced and composition; purchases and sales transactions, instalments, voucher register system; cash and bank transactions, reconciliations; accounts and bills payable and receivable; ledgers, general and subsidiary, controlling accounts; trial balance, adjustments and closing entries; salary and wage records; accrued and deferred income and expenses; profits, determination; departmental accounting. Accounts of corporations: Organization, capital and operation, acquisition of private business, balance sheet, financial trading, industrial, legal requirements, form and content; trading and profit and loss accounts, form and content; Progressive realization and distribution, sale of business to limited liability company. Lectures and practice. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Accountancy 102. Advanced Accountancy

An advanced course in accountancy for students who have completed Accountancy 101 or its equivalent. Topics included: Inventories, physical and perpetual records; accrued and deferred income and expenses, fixed assets and wasting assets, acquisition and disposal, valuation, appreciation, amortization, appraisal adjustments; depreciation and obsolescence, industrial, municipal, public utility, etc.; reserves, reserve funds, sinking funds, investments; revenue and expense accounts; capital and income expenditures; profits, determination; agencies; analytical accounting or statement analysis, statement of comparative working capital, ratio analysis of financial statements, use of comparative percentages, derivation and application of funds statements, etc. Accounts of corporations: Organization, capital and operation, classes of capital stock (issue, increase, reduction, conversion), bond issues and redemption, investment in subsidiaries, goodwill and secret reserves, surplus (earned capital, distributable), dividends; balance sheet, financial, trading, industrial, legal requirements, form and content, manufacturing, trading and profit and loss accounts, including production costs, overhead expense, distribution, etc., form and content. Lectures and practice. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Accountancy 103. Cost Accounting

An advanced course in accountancy for students who have completed Accountancy 101 and 102 or the equivalent. Designed to provide the student with a working knowledge of cost analysis, it covers the procedure required in accounting for material, labor, and manufacturing expense costs and includes a comprehensive outline of specific order, process and standard cost systems. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, every year.

Accountancy 104. Auditing and Higher Accountancy

(1) Auditing: Audit, nature and definition, objects, types and characteristics of each, preparation, programmes, conduct in clients' offices, use of audit marks, working papers; auditors, appointment, powers, legal duties and responsibilities; verification of balance sheet, including cash book and bank balances, accounts and bills receivable, inventories, land, buildings and equipment, deferred charges, liens and other forms of hypothecation of assets, loans payable, accounts and bills payable, accrued charges, long-term and contingent liabilities, reserves for bad debts, depreciation, etc.; secret reserves, capital and surplus accounts, balance sheet notations; internal check; investigation of fire loss claims, fraud, etc. Audit of business transactions generally, including formation of single proprietorships, partnerships, partnerships and companies, purchases, sales, cash receipts and disbursements, banking, forms of fraud and its detection, salaries, wages, commissions, consignments, packages and empties, excise and sales taxes, dividends; verification of surplus and operation statements; special features of limited liability companies, partnerships, joint ventures, single proprietorships, auditors' reports and certificates. (2) Higher Accountancy: Branch accounts; reconstructions and reorganizations, mergers and consolidations, holding companies; partnership accounts and comparison with limited liability companies, capital and operating, retirement of partner, dissolution, progressive realization and distribution, sale to limited liability company. (Full course.)

Day Division: Not given 1943-44.

Evening Division: Two terms, every year.

COMMERCE**Commerce 105. Business Administration**

A course in the science of business designed to serve as an introduction to studies in the fields of commerce. Topics included: Origin, growth and classification of business organizations, types of securities, costing, marketing, advertising, plant location, production control, purchasing, wage systems and labour relations, transportation. Particular attention is paid to government regulations affecting business, such as the Combines Investigation Act, labour legislation, and wartime controls. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Commerce 106. Commercial Law

A general survey of the law relating to business and commerce, including study of the law of obligations with special reference to contracts in general; lease and hire and the rights and obligations of landlords and tenants; forms of sale and the duties and liabilities of vendor and purchaser; wills and successions; mandate or agency; forms of partnership and the rights and obligations of partners; loans; civil procedure. Reference is made in all cases to the law of the Province of Quebec. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, every year.

Commerce 107. Advertising

This course explains the basic principles involved in creating advertisements and in carrying on complete advertising campaigns. Stress is placed upon the actual writing of copy and designing of lay-outs for various advertising media, an understanding of the processes of photo-engraving, the appreciation of advertising art, and a basic knowledge of advertising agency practice. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, every year.

Commerce 108. Commercial Law (Advanced)

This course continues the survey commenced in Commerce 106, dealing with (a) Bills of exchange—negotiable instruments, particularly cheques, promissory notes and drafts, (b) Corporations—the Dominion and Quebec Companies Acts are compared and applied to various companies. Companies are traced from their inception to final production, and the duties of the various members are examined in detail, (c) Insurance—a study of the law regarding the operation of the various insurance companies in the Province of Quebec, the various forms of insurance and the rights and obligations of the parties thereto, (d) A working knowledge of the Bankruptcy Act, the Bank Act and the Income Tax Act, (e) Carriers and transportation, (f) Copyright, patents and trade marks. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, every year.

Commerce 109. Transportation and Traffic

Following a brief general study of the economics and history of transportation this course will deal with the details of transportation and traffic management in Canada, including: types of transportation service, rates and classifications, regional traffic problems and their relation to economic geography, shipping principles and routine, etc. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1944-45 and alternate years.

Commerce 110. Marketing and Merchandising

A general study of modern methods of wholesale and retail distribution, sales organization and promotion, price policies and economic value, market analysis and advertising, purchasing, the relation of these to production. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, 1944-45 and alternate years.

Commerce 111. Advertising (Advanced)

This course is open to students who have completed the course Commerce 107 or have an equivalent working knowledge of the theory and practice of advertising. Topics treated include: advanced study of the construction and styles of advertising copy; direct mail advertising; direct mail copy; format, lay-out and printing of mailing pieces; organization and execution of direct mail campaigns; house organs. Lectures, discussion, assignments, and criticism by the instructor. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, every year.

Commerce 113. Company Secretarial Practice

Duties of the secretary of a limited company, including his statutory duties under the companies' acts, books and records to be kept, business problems to be faced, issuance of shares, and payment of dividends, preparation of governmental reports, and meetings of directors and shareholders. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, every year.

Commerce 114. Credits and Collections

A practical course designed to explain phases of credit and financing apart from banking and corporation finance; it deals with both wholesale and retail credit and co-relates the subject thoroughly with such other fields as economics, commercial law and accountancy. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1944-45 and alternate years.

Commerce 115. Investment Analysis

The theory of investment from the standpoint of the investor. Includes treatment of investment objectives, investment institutions, evaluation of sources of information and counsel, media of investment, methods of analyzing risks and returns, and the formulation of appropriate investment policies for individuals and institutions. This course is most suitable for students who have taken Commerce 116 or the equivalent. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, 1943-44 and alternate years.

Commerce 116. Corporation Finance

This course deals with the administrative and managerial problems of financing business enterprises. Includes problems of organization, promotion, securing of capital through issuance of securities, capitalization, cash control and budgeting, dividend policies, financial ratios, reorganization, consolidation and related issues. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, 1943-44 and alternate years.

Commerce 117. Insurance

After a brief review of the history and problems of insurance this course deals with various types of insurance organizations, the principles of reserves, premiums and investments; policies, policy loans and surrender values; the mortality table. The treatment is both descriptive and mathematical. While the emphasis is on life insurance, other types of risk and risk-bearing are dealt with briefly. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, every year.

Commerce 118. Purchasing

A course in the practical problems of purchasing and the purchasing agent in business and industry. Programme of lectures, readings, reports and investigations, planned with the cooperation and assistance of the Purchasing Agents Association of Montreal. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 1st term, every year.

Commerce 119. Taxation and Government Controls

This course is devised to give authentic and up-to-date information on two of the major factors in business today. Wherever possible guest specialists are used as lecturers. Discussion of problems is encouraged and key notes, including current governmental literature, are made available. The class is advised of important changes as they occur. Topics include: (a) Taxation—excess profits tax, normal tax, corporation and personal income taxes, compulsory savings, sales taxes, succession duties, and other levies; (b) Government Controls—Canadian Government war organizations, foreign exchange control, unemployment insurance, wartime price control, wartime salaries and wages, and other important controls. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Commerce 120. Legal Documents and Procedures

This course provides training in the procedure peculiar to a legal or notarial office. Instruction is given in the routine drafting of the legal forms necessary for actions, defences, injunctions, interdictions, contracts, notarial deeds and documents, etc., and practice in stenography, using legal terms, also is provided. Practical work is done in the Court House and the Archives. (Half course.)

Day Division: 2nd term, every year.

Evening Division: Not given 1943-44.

Commerce 121. Stenography

A course in shorthand writing, using the Pitman system, designed, in two years, to enable the student to take dictation quickly and accurately and to transcribe it efficiently. The course is divided into two parts: Commerce 121a, Shorthand Theory, and Commerce 121b, Stenographic Practice and Transcription, one part to be taken in each of the two years. (This course is open only to undergraduates in the College. Other students wishing to follow similar studies will register in Sir George Williams Business School. See separate announcement.) (Half course, each part.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Commerce 122. Typewriting

A course in touch typewriting which may be taken alone, or coordinated with Commerce 121, Stenography. This course is designed, in two years, to enable the student to understand the most common makes of typewriters and to operate them accurately, quickly and efficiently. The course is divided into two parts: Commerce 122a, Typewriting Method, and Commerce 122b, Typewriting Practice and Speed, one part to be taken in each of the two years. (This course is open only to undergraduates in the College. Other students wishing to follow similar studies will register in Sir George Williams Business School. See separate announcement.) (Half course, each part.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Commerce 123. Office Management

A course in the principles of office management, including such topics as: The function of the office in business; organization and principles of control; office systems and routines; office equipment and labour-saving devices; office planning and layouts; selection and training of office personnel; office communications. (Half course.)

Day Division: Not given 1943-44.

Evening Division: 2nd term, every year.

ECONOMICS

Economics 101. Introduction to Economics

A study of society from the economic point of view, this course makes its approach through the analysis of actual current problems in this area. By means of the study of such vital questions as: the distribution and exchange of wealth; the organization of trade and industry; finance, banking, international exchange, and the money market; labor problems; public finance and governmental systems; economic depressions, and their causes and effects; etc.; the student is enabled to arrive at some fundamental principles of the modern industrial system and to establish a sufficient background for his own thinking on economic questions. (Undergraduates are advised to take Social Science 101 prior to or concurrently with Economics 101.) (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Economics 102. Evolution of Modern Economic Society

This course deals with the historical development of modern industrial society out of medieval folk society. Attention is given to the various changes in agriculture, industry and commerce by which the basis for modern economic life was laid. The main emphasis is upon major trends and their causal interrelationships and the integration of social, economic, political and ideological elements. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

Economics 103. Political Theory and Modern Governments

See Political Science 101.

Economics 104. Economic Geography

This course deals with the way in which geographic conditions influence, and have influenced, the products, the occupations, and the ways of life of the various peoples of the world, and provides an understanding of the natural resources of the world, and the geographical factors which affect their exploitation, transportation and use in the satisfaction of wants. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Economics 105. Economics and Politics of Canada

A survey of Canada's federal, provincial and municipal governmental institutions, its economic resources and organization, its culture and its people, provides the background for an intensive consideration of present problems in all these areas of our national life. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

Economics 106. International Economic Relations

This course deals with the theory of international values, the mechanism of adjustment of international balances, foreign exchange theory, the international aspects of monetary and banking theory, and tariff theory. A survey is also made, with particular reference to Canada, of the international aspects of the economic policies and activities of governments, including such topics as: commercial treaties, colonial policies, international capital investments, control of raw materials, economic factors in war and diplomacy. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Economics 107. Industrial Legislation and Labour Problems

A study of legislation affecting labour and employment and of the industrial and social conditions to which such legislation applies. In particular, the course will deal with such problems as: Conditions and hours of work, wages, immigration, female and child labour, labour organizations, trade unionism, employer-employee relationships, workmen's compensation, unemployment and unemployment insurance, taxation as it affects labour, and social and industrial legislation in general. The relationship of these problems to personnel management in industry will be examined. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 1st term, every year.

Economics 108. Financial Organization, Money and Banking

A practical course in the modern financial structure and its technical details including such topics as: credit instruments, money and currency, foreign exchange, the corporation, capital, securities, banking, insurance, trust companies, public finance and taxation, etc. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Economics 109. History of Economic Thought

A brief survey of the whole field of economic thought and a more intensive study of the "classical school" of British economists, whose doctrines are studied in relation to the problems and discussions of today. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Economics 110. Consumer Economics

A study of economics from the point of view of the consumer and purchaser, including such phases of the subject as: the consumption of wealth, retail price and production cost, establishment and control of standards, consumer testing and buying aids, housing and community planning, household economics and family income, cooperative buying and other types of organized purchasing. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Economics 111. Economic Problems in Modern Society

A course dealing chiefly with price under conditions of imperfect competition. The topics covered give an insight into employment, distribution, monetary and business cycle theory, and into the problems of price rigidity, unemployment, collective bargaining, excess capacity, monopoly, and consumer welfare. Designed primarily for students specializing in economics and political science and recommended to those intending to take several courses in economics or commerce. Pre-requisite: Economics 101 or its equivalent. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Economics 112. Public Finance

A general study of the principles of public expenditures and their trends. An analysis of property, personal and corporate income, death, gift and commodity taxes and customs duties, and of the fiscal policies growing out of the problems of inter-governmental coordination, tax justice and social control. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

EDUCATION**Education 101. Philosophy of Education**

A seminar course for advanced students, on the philosophy of education. The development of educational theory will be studied, and particular attention will be given to the educational movements and philosophers of the twentieth century. The aim of this course will be to assist the student to develop an orientation and integration of his own education, as well as to provide a background of educational theory for those who may be preparing for professional work as social agency or Association secretaries. (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

Education 102. Adult Education

Further study of the theory of education, with particular emphasis upon the education of adults. Attention is given to the history, principles and methods of group work and adult education, both formal and informal. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Education 103. Principles of Religious Education

In this course are considered the basic concepts underlying an educational approach to religion with particular reference to the teaching of Jesus as fundamental. An attempt is made to develop the major theses of the course out of the experiences of the class members. This course and the following are suitable for teachers, Christian Association secretaries, group leaders, etc. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: Not given 1943-44.

Education 104. Curriculum and Practice in Religious Education

The major questions of method in religious education are dealt with. Contrasts between divergent theories of the curriculum are discussed as well as various aspects of character development. Types of learning and activity as related to character and personality growth are considered at length. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: Not given 1943-44.

See also: Psychology 103, Educational and Vocational Guidance.

Psychology 105, Psychology of Education.

HISTORY**History 101. History of Earliest Civilizations**

The aim of this course is to give the student a vital appreciation and understanding of the story of early mankind so far as it is known at present. Emphasis is placed on the gradual emergence of those cultures from which our own civilization has developed. Egyptian, Babylonian, Hebrew, Persian, and Cretan cultures are dealt with at some length. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

History 102. Greek and Roman History

The work of this course concentrates upon the classical periods of Greece and Rome after the battle of Marathon. The contribution of these peoples to modern civilization is emphasized. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

History 103. History of European Civilization

This course deals with the general history of Europe from the break-up of the Roman Empire to the present day, including a study of developments since World War I. Throughout this course emphasis is placed upon the origins in history of various elements in the present political, social and economic situation in Europe. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

History 104. History of Canada

An opportunity is provided in this course to study the history of Canada from the discovery of America by Europeans to the present day. Through a knowledge of the evolution of Canadian political, social and economic institutions, the student is led to analyse more adequately the present problems of the nation. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Summer term, 1943.

Two terms, 1944-45 and alternate years.

History 105. History of the Latin American Republics

This course covers the political, social and economic history of Mexico, the West Indies, and all countries in South America. The development of each is studied, with special reference to their interdependence. The growth of Pan-Americanism is traced, and the implications and potentialities of this movement for the United States of America and for Canada are analysed. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

History 106. History of the United States of America

An introductory course dealing mainly with the period since the American Revolution. The purpose is to develop an understanding of present conditions in the principal power in this hemisphere. Special attention is paid to the development of the United States in the Pacific, and to the background of the conflict with Japan. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

History 107. History of Social and Political Ideas

A study of the origins and development of the social and political ideas which are current in the world today. The historical approach is used to provide a sound basis for the understanding of contemporary ideologies, particularly democracy, communism and fascism. Students are required to complete a course in European history before taking this course. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

MATHEMATICS**Mathematics 102. Mathematics of Finance**

An introduction to the theory of interest and bond values. The course is designed to acquaint the student with those commercial problems involving compound interest and covers annuities (ordinary, certain and deferred), amortization and sinking fund factors, depreciation, etc., and bond values. (Half course.)

Day Division: 1st term, every year.

Evening Division: 1st term, every year.

Mathematics 103. Statistical and Graphical Methods

The elementary principles of statistical method as applied in the scientific study and interpretation of economic and social phenomena. The course includes the study of averages, percentiles, measures of dispersion and central tendency, tabulation, frequency distribution, frequency curves, correlation, index numbers, graphical representation and classification, etc. (Half course.)

Day Division: 2nd term, every year.

Evening Division: 2nd term, every year.

POLITICAL SCIENCE**Political Science 101. Political Theory and Modern Governments**

A study will be made of the nature of the state and its development; the position of individuals in society, their rights and relationships; the dependence or independence of the unit in the group, and the conflicting claims of various organizations within the state. The origin and development of democracies, the rise of dictatorship since the War of 1914-18, the underlying ideas of modern politics and the processes of government in the chief countries of the world will be dealt with. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Political Science 102. International Political Relations

This course will deal with such topics as: the rise of the Western state system; national sovereignty and international law; balance of power, diplomacy, nationalism and imperialism, the settlement of international disputes, public international organizations, patriotism, the politics of power, war and peace. Through lectures and class discussions the student will gain some knowledge of the complex pattern of international relations which will serve as a basis for evaluating current events in modern society. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.

Political Science 103. Elements of Law

An introduction to law as it affects the ordinary citizen. A general survey of the growth and primary principles of civil, criminal and international law, together with a study of the concepts of human justice and social responsibility. (For commercial law, see Commerce 106-108.) (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Political Science 104. Problems of Public Administration

A study of the practical problems and methods of government approached from the point of view of the citizen and the voter. While particular attention is paid to local civic government, the course includes a study of the details of provincial and federal administration and public finance. The relationship of the routine of public administration to political and social theory is also discussed. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: Summer term, 1943.

2nd term, 1944-45 and alternate years.

See also: History 107, History of Social and Political Ideas, and Economics 112, Public Finance.

PSYCHOLOGY

Psychology 101. A General Study of Mind and Behaviour

The purpose of this course is the development of an adequate understanding of human behaviour and experience. The work includes a study of the sense organs and nervous system, perception, learning, memory, motivation and the basic urges, emotional reactions, personality development, adjustment and integration, abnormal personality, mental abilities and aptitudes, and the application of psychological findings to the problems and activities of everyday life. This course is pre-requisite to all other courses in psychology listed below. (Full course.)

Day Division: Two terms, every year.

Evening Division: Summer term, 1943.

Two terms, every year.

Psychology 102. Advanced General Psychology

This course makes a more detailed study of general, physiological and comparative psychology. The work includes discussion of the various schools of psychological thought, the development of mind and behaviour in animals and children, individual differences, both normal and abnormal, and the theory, construction, administration and interpretation of mental tests. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Psychology 103. Educational and Vocational Guidance

A course in the theory, principles and practice of scientific guidance in education and in industry. Detailed study and practical work in the techniques of analysing abilities, aptitudes, traits and interests, and in the methods of personality adjustment, self-discovery, orientation and re-education of the whole person, which are the heart of the guidance process. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Not given 1943-44.

Psychology 104. Psychology in Industry and Commerce

A specialized course in the psychology of business and industry, and the application of its principles to such matters as: efficiency, employee selection and placement, personnel policy and problems, advertising, public relations, personal adjustment, etc. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Psychology 105. Psychology of Education

A seminar course for advanced students, on the psychology of education, both formal and informal. In this course students will consider not only the teaching of skills and information, but also the broader problems of education as the full growth and adjustment of persons in society. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: Not given 1943-44.

Psychology 106. Social Psychology

A study of the individual in his socio-psychological environment, the cultural and hereditary determinants of behaviour, the uniformities and variations among human beings, sex and race differences as determined by cultural patterns, social interaction, attitudes, stereotypes, propaganda, and race prejudice. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

Psychology 107. Personality and Mental Hygiene

The course deals with the nature of personality, the correlation of mental characteristics with physical traits, bodily form and expressive movements, the analysis of intellect, temperament and character, the integration and development of personality and its relation to the patterns of culture, the problem of types, personality tests, rating scales and inventories. (Half course.)

Day Division: 2nd term, 1943-44 and alternate years.

Evening Division: 2nd term, 1944-45 and alternate years.

Psychology 108. Psychology and Crime

A specialized course in the application of psychology to problems of legal procedure, crime and punishment. The course includes the study of the psychology of the judge, the jury, the witness, the police and the criminal. Discussion of the social and psychological factors contributing to crime and delinquency, and consideration of the various penal methods also is included. (Half course.)

Day Division: 1st term, 1943-44 and alternate years.

Evening Division: 1st term, 1944-45 and alternate years.

SOCIOLOGY

Sociology 102. Modern Sociological Problems

This course attempts to give the student a scientific approach to the origins, growth and development of modern society. Social forces and processes are studied with a view to understanding the forms and institutions which give permanence to our social structure. Attempts are made through actual contacts with institutions, social problems and field workers to make the course as realistic as possible. (Full course.)

Day Division: Two terms, every year.

Evening Division: Two terms, every year.

Sociology 103. Social Disorganization and Social Therapy

This course examines the causes, nature and effects of various disruptive factors in present-day society, with special emphasis upon personal, family and community disorganization, and surveys the work and function of social welfare organizations and institutions designed to correct these conditions of individual and social maladjustment. (Full course.)

Day Division: Two terms, 1943-44 and alternate years.

Evening Division: Two terms, 1944-45 and alternate years.

Sociology 104. General Anthropology

The evolution of man and his culture to the historical era; the differentiation of races and the problem of race superiority; general principles of cultural anthropology; the origin and development of social, economic and political institutions; marriage, the family, religion, art, science, and other problems of culture. (This course may be taken for credit either as a Social Science or as a Natural Science.) (Half course.)

Day Division: 1st term, 1944-45 and alternate years.

Evening Division: 1st term, 1943-44 and alternate years.

Sociology 105. Social Movements and Institutions

The nature and functions of the institutions and social movements comprising modern society. Particular emphasis is placed on the forms evolved by these institutions to meet the particular problems and needs of the urban community. (Full course.)

Day Division: Two terms, 1944-45 and alternate years.

Evening Division: Two terms, 1943-44 and alternate years.

Sociology 106. The Modern Community

This course analyzes the nature of the community, the ecological patterning, the social forces and processes which determine physical and social change in a modern urban community. An intensive study is made of pathological problems of the urban area, e.g., poverty, housing, unemployment, the slum, the broken home, delinquency areas, with actual contacts with these conditions. Also included is a study of the forms of social control at work in these areas. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Sociology 107. The Family

This course aims to study the family in primitive and historic society. A study is made of the effects of the industrial revolution in relation to the evolution of the modern family, the dominant trends in the forms and functions of the modern family, comparative analyses of trends in various countries, urban-rural comparison, problems of the modern family (desertion, divorce, separations), forms of marriage, and probable direction of changes in the family of the future. (Half course.)

Day Division: Not given 1943-44.

Evening Division: Not given 1943-44.

Sociology 108. Character Building Agencies and Group Work

A series of three courses (Sociology 108a, 108b and 108c) in the practical aspects of the work of the Christian associations and allied institutions. Such topics as leadership training, boys' clubs, principles of group work, physical education, camping, business administration and work with military forces, are dealt with. An attempt is made to make these courses as practical as possible by use of the resources of the Y.M.C.A. and other agencies in Montreal. These three courses are given in rotation, one each year, so that an individual may take them all in any three-year period. They should be taken by undergraduates only in conjunction with other courses in the social sciences and are required in order to qualify for the Diploma in Association Science. (Half course.)

Day Division: Sociology 108a—Two terms, 1944-45 and every third year.
Sociology 108b—Two terms, 1945-46 and every third year.
Sociology 108c—Two terms, 1943-44 and every third year.

Evening Division: Not given 1943-44.

See also: Psychology 106, Social Psychology.

Psychology 108, Psychology and Crime.

Sociology 109. The American Indian

The advent of man to America; early cultural developments and the differentiation of the various groups or tribes; the culture of the Mayas, Toltecs, Aztecs, Pueblos, Iroquois, Eskimos, Northwest coast tribes, Andean and other early civilizations of North and South America; the cultural contributions of the Indian to the white man's civilization. (Half course.)

Day Division: 2nd term, 1944-45 and alternate years.

Evening Division: 2nd term, 1943-44 and alternate years.
